

MAHARAJA SURAJMAL BRIJ UNIVERSITY, BHARATPUR

SYLLABUS

M.Sc. Zoology (Pre.) (NEW SCHEME)

M.S. BRIJ UNIVERSITY, BHARATPUR

SCHEME OF EXAMINATION

M.Sc. ZOOLOGY

(Annual Scheme)

Each Theory Paper	3 hrs. duration	100 Marks
Practical (Two days)	5 hrs. duration	300 marks

1. The Number of papers and the maximum marks for each paper and practical shall be shown in the syllabus for the subject concerned. It will be necessary for a candidate to pass in the theory as well as in practical part of a subject/paper separately.
2. A candidate for a pass at each of the previous and the final Examinations shall be required to obtain (i) at least 36% marks in the aggregate of all the papers prescribed for the examination and (ii) at least 36% marks in practical (s) wherever prescribed at the examination, provided that if a candidate fails to secure at least 25% marks in each individual paper at the examination and also in the dissertation/ Survey report/ field work(if any), wherever notwithstanding his having obtained the minimum percentage of marks required in the aggregate for that examination. No division will be awarded at the previous examination. Division shall be awarded at the end of the final examination on the combined marks obtained at the previous and the final examination taken together.
3. If a candidate clears any paper(s) Practical(s) Prescribed at the previous and/or final examination after a continuous period of three years, then for the purpose of working his division the minimum pass of marks only viz. 25% (36% in case of practical) shall be taken into account in respect of such papers/practicals.

M.Sc. PREVIOUS (ANNUAL SCHEME)

Paper - I Biosystematics and Taxonomy

Paper - II Structure & Function of Invertebrates

Paper - III Molecular biology and Biotechnology

अकादमिक प्रभारी

100
निम्नलिखित दस्तावेजों को सही रूप से लिया गया है।

Paper - IV General Physiology

Paper - V Biochemistry

Paper - VI Population Genetics and Statistical methods.

(Laboratory Exercises, Seminar Demonstration)

Practical Day First and Day Second 300 Marks

Note:- In M.Sc. Zoology Previous Examination the theory papers will have the following pattern.

Question papers will have 5 (five) questions in all having equal marks

- (i) Question number I will be compulsory and will have 20 very short answer question of 1 mark each.
- (ii) Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.
- (iii) Question numbers 4 and 5 will be long answer type questions with internal choice.

Paper- I : BIOSYSTEMATICS AND TAXONOMY

3 Hours duration

Max. Marks: 100

Periods : 80

Theory paper will have the following pattern.

Question paper will have 5 (five) question, having 20 marks each ...

- (i) Question number will be compulsory and will have 20 very short answer question of 1 marks each.
 - (ii) Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.
 - (iii) Question numbers 4 and 5 will be long answer type questions with internal choice.
1. Definition and basic concept of biosystematics and taxonomy
 - 1.1 Historical resume of Systematics.

अकादमिक प्रभारी

संगीत
नवाई

ज्ञानीय
प्रौद्योगिकी

- 1.2 Importance and applications of biosystematics in biology.
- 1.3 Manual basis of histo-systematics-different attributes.
2. Trends in biosystematics: Concept of different conventional and newer aspects
 - 2.1 Chemotaxonomy
 - 2.2 Cytotaxonomy
 - 2.3 Molecular taxonomy
3. Molecular perspective on the conservation of diversity
 - 3.1 Diversity and ecosystem process: Theory, achievements and future directions.
4. Dimensions of speciation and taxonomy characters
 - 4.1 Dimensions of speciation - Types of lineage changes: production of additional lineage.
 - 4.2 Mechanisms of speciation, panmictic and apotmictic species.
 - 4.3 Species concept and species category. Different species concepts subspecies and other infra-specific categories.
 - 4.4 Theories of biological classification: hierarchy of catagories.
 - 4.5 Taxonomic characters of different kinds, origin of reproductive isolation and biological mechanism of genetic incompatibility, Haldane's rule.
5. Procedure keys in taxonomy.x
 - 5.1 Taxonomic procedures: Taxonomic collections, preservation, correct process of identification.
 - 5.2 Taxonomic keys: Different kinds of taxonomic keys, their merits and demerits.
 - 5.3 Systematic publications and different kinds of publications.
 - 5.4 Process of typification and different Zoological types.
 - 5.5 International Code of Zoological Nomenclature (ICZN) and its operative principles, interpretation and application of important rules. Zoological nomenclature, formation of Scientific names of various taxa.
6. Evaluation of biodiversity indices
 - 6.1 Shannon-Weinners index, dominance index.
 - 6.2 Similarity and dissimilarity index.
 - 6.3 Association index

2. Locomotion
 - 2.1 Flagellar and ciliary movement in Protozoa.
 - 2.2 Hydrostatic movement in Coelenterata, Annelida and Echinodermata.
3. Nutrition and Digestion
 - 3.1 Patterns of feeding and digestion in lower Metazoa.
 - 3.2 Filter feeding in Polychaeta, Mollusca and Echinodermata.
4. Respiration
 - 4.1 Organs of respiration: Gills, lungs and trachea.
 - 4.2 Respiratory pigments.
 - 4.3 Mechanism of respiration
5. Excretion
 - 5.1 Organs of excretion: Coelom, Coelomoducts, Nephridia and Malpighian tubules.
 - 5.2 Mechanisms of excretion.
 - 5.3 Excretion and Osmoregulation
6. Nervous System
 - 6.1 Primitive nervous system: Coelenterata and Echinodermata.
 - 6.2 Advanced Nervous system: Annelida, Arthropoda (Crustacea and Insecta) and Mollusca (Cephalopoda)
 - 6.3 Trends in neural evolution
7. Invertebrate larvae
 - 7.1 Larval forms of free-living invertebrates
 - 7.2 Larval forms of parasites
 - 7.3 Strategies and evolutionary significance of larval forms
8. Minor Phyla
 - 8.1 Concept and significance (Mesozoa, Ctenophora, Rhyncocoela, Protostomes, Deuterostomes)
 - 8.2 Organization and general characters.

PAPER-VI:

POPULATION GENETICS AND STATISTICAL METHODS

Duration: 3Hours

Max.Marks : 100

Periods: 80

Note:- In M.Sc. Zoology Previous Examination the theory paper will have the following pattern.

Question paper will have 5 (five) questions in all having equal marks

- (i) Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.
- (ii) Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.
- (iii) Question numbers 4 and 5 will be long answer type questions with internal choice.

Unit-I

Statistical Methods

1. Definition and application of Biostatistics.
2. Principles and practice of statistical methods in biological research, samples and populations
 - 2.1 Basic statistics-average.
 - 2.2 Statistics of dispersion, coefficient of variation.

- 2.3 Standard errors: Confidence limits.
- 2.4 Probability distributions (binomial, Poisson and normal)
- 2.5 Tests of statistical significance- (Z-test, Students t-test and F-test)
- 2.6 Simple correlation of regression.
- 2.7 Analysis of Variance

Unit-II: Population Genetics

1. Concepts of evolution and theories of organic evolution with and emphasis on Darwinism, Sexual selection and Zahavi's rule.
2. Neo-Darwinism
 - 2.1 Hardy-Weinberg's law of genetic equilibrium and its applications
 - 2.2 Detailed account of destabilizing forces-
 - (i) Natural selection
 - (ii) Mutation
 - (iii) Genetic drift
 - (iv) Migration
 - (v) Meiotic drive
 - 2.3 Genetic structure of natural populations.
 - 2.4 Phenotypic variation
 - 2.5 Models explaining changes in genetic structure of populations.
 - 2.6 Factors affecting human disease frequency.
3. Molecular population genetics
 - 3.1 Patterns of change in nucleotide and amino acid sequences.
 - 3.2 Ecological significance of molecular variations.
 - 3.3 Emergence of Non-Darwinism-Neutral hypothesis.
4. Genetics of Quantitative traits in populations.
 - 4.1 Analysis of quantitative traits.
 - 4.2 Quantitative traits and natural selection.
 - 4.3 Estimation of heritability.
 - 4.4 Genotype-enviroment interactions.
 - 4.5 Inbreeding depression and heterosis.
 - 4.6 Molecular analysis of quantitative traits.
 - 4.7 Phenotypic plasticity.

5. Genetics of specifications
 - 5.1 Phylogenetic and biological concept of species.
 - 5.2 Patterns and mechanisms of reproductive isolation.
 - 5.3 Models of specification (allopatric, sympatric, parapatric).
 6. Molecular Evolution
 - 6.1 Gene evolution.
 - 6.2 Evolution of gene families, molecular drive.
 - 6.3 Assessment of molecular drive.
 - 6.4 Micro-and macro-evolution.
 7. Molecular phylogenetics
 - 7.1 Construction of Phylogenetic trees.
 - 7.2 Phylogenetic inference-distance methods, parsimony methods, maximum likelihood method.
 - 7.3 Immunological techniques.
 - 7.4 Amino acid sequence and phylogeny.
 - 7.5 Nucleic acid phylogeny-DNA-DNA hybridizations, restriction enzyme sites, nucleotide sequence comparisons and homologies.
 - 7.6 Molecular clocks.

PRACTICAL EXERCISES

I. Study of Anatomy:

a. Major:

1. **Leech:** Reproductive, excretory, nervous and haemocoelomic systems.
2. **Crab:** Nervous system.
3. **Scorpion:** Nervous and reproductive systems.
4. **Mollusca:** General anatomy of Aplysia and Nervous systems of Patella. Lamellidens, Mytilus. Sepia and Aplysia.

Note: Software on alternatives to dissection can be purchased in Lab. Virtual dissection can be substituted. The department can send membership to such software dealers.

b. Minor:

5. Cockroach Brain, Proventriculus ganglion, Testis, Salivary gland
6. Book lungs of scorpion
7. (i) Study of Aristotle's lantern of Sea urchin and disarticulated parts of Aristotle's lantern (Through figure Only)
- (ii) Testicular nephridia of Leech.

भारतीय विश्वविद्यालय

विज्ञान
विभाग
विज्ञान
विभाग
विज्ञान
विभाग

II. Museum Specimens: Identification, classification and distinguishing features of important representatives from various groups (Protozoa to Hemichordata).

III. Study of Permanent Preparations (Protozoa to Hemichordata):

Ameba, Entamoeba, Polystomella, Actinophryx, Euglena, Noctiluca, Volvox colony, Trypanosoma, Giardia, Opalina, Nyctotherus, Balantidium, vorticella, Monocystis, Plasmodium, Sycon T.S. and L.S. Gemmule, Obelia colony, Obelia medusa, Aurelia tentaculocytes, T.S. Fasciola hepatica sections through various regions of the body, Hirundinaria body sections through various regions, Daphnia, Cypris, Cyclops, T.S. Peripatus.

Larva: Aurelia-planula, Redia, Cercaria, Meta-cercaria, Onchosphere, Cysticercus, Trochophore, Nauplius, Zoa, Mysis, Phyllosoma, Veliger, Glochidium, Bipinnaria. Ophiopluteus, Echinopluteus, Auricularia, Tornaria.

IV. Biological Chemistry:

- (i) Identification of protein, Carbohydrate and lipid in various tissues/body fluids/food material.
- (ii) Identification of different kinds of mono-, di- and poly-saccharides in biological and chemical materials.
- (iii) Verification of Beer-Lambert's Law.
- (iv) Quantitative estimation of the following in various tissues:
 - a) Carbohydrates: Glycogen, glucose.
 - b) Proteins: Total Proteins
 - c) Lipids: Phospholipids and cholesterol.
 - d) Nucleic acid: DNA and RNA.
 - e) Enzymes: Acid and alkaline phosphatases.

V. Physiology:

- (i) Study of the following with the help of Computer Assisted Learning (CAL) (please see E-pharm programme).
 - A. The effect of K, Ca, acetylcholine and epinephrine on the isolated heart of frog and conclude your data with the graphic representation Computer Assisted Learning (CAL) be included.

अकादमिक प्रभारी

150. नोट्स
गोपनीय

- B. The effect of various doses of acetylcholine and Nor-epinephrine on blood pressure, heart rate and respiratory rate of the rabbit.
- C. The effects of Atropine Epinephrine, Ephedrine and Eserine on Rabbit's eyes. Other such exercises can be framed from the E-Phram software.
- (ii) Determination of blood pressure, pulse rate, heart beat and respiration rate.
 - (iii) Photometric determination of hemoglobin in blood sample.
 - (iv) Determine of MCV, MCH, MCHC and colour index of the given sample of blood.
 - (v) Demonstration of the following in blood: clotting time, erythrocyte sedimentation rate, haemolysis, crenation and preparation of haematin crystals.
 - (vi) Determination of the urea in urine/blood.
 - (vii) Determination of the glucose in urine.
 - (viii) Study of digestive enzymes in different parts of the alimentary canal.
 - (ix) Demonstration of Blind spot in Human eye.

VI. Cell & Molecular Biology & Biotechnology:

- (i) Squash and smear preparations of testis of cockroach and grasshopper, acetoorecin, Fuelgen and Giemsa Staining of these preparations.
- (ii) Study of mitosis in onion root tip.
- (iii) Study of giant Chromosomes in the salivary gland of Chironomus or Drosophila larva.
- (iv) Vital and supravital staining (With neutral red and Janus Green B) of cells of the testis of any insect or mammal to study the mitochondria.
- (v) Chromosome counts in cells of the testis of an insect or mammal or cells of the bone marrow of a mammal.
- (vi) Study of prepared microscopic slides, including those showing various cell types, mitosis, meiosis and giant chromosomes.
- (vii) Paper Chromatography: Unidimensional chromatography, using amino acids from purified samples and biological materials.

अकादमिक प्रभारी

Dr. C. V. Rao
Vice-Chancellor
University of Hyderabad

(viii) Electrophoresis: Paper/Horizontal/Vertical - Proteins/DNA/RNA.

VII. Genetics:

- (i) Culture of Drosophila and study of its life cycle.
- (ii) Identification of male and female Drosophila.
- (iii) Identification of wild and mutant forms of Drosophila.
- (iv) Monohybrid and dihybrid inheritance in Drosophila.
- (v) Simple problems based on Mendelism.
- (vi) Identifications of blood groups in humans.
- (vii) Demonstration of sex chromatin (Barr bodies).

VIII. Statistical Methods in Biology:

- (i) Preparation of frequency tables and graphs/line diagrams/bar diagrams/histogram/Pie charts.
- (ii) Calculation of standard deviation, variance and standard error of mean.
- (iii) Calculation of probability and significance between means using t-test and Chi-square test.
- (iv) Plotting the slope of a line on a graph; calculations of the slope of a line, coefficient correlation and regression.
- (v) Exercise based on population genetics.

IX. Biodiversity Study:

- (i) Species richness, evenness, Simpson Index.
- (ii) Preparation of fact sheet of common wildlife of your area.

(The candidate are required to go out door for data collection with in campus or outside)

OBSERVATIONAL AND FIELD STUDIES

There are unlimited amounts of alternative practicals that can be carried out using observational and other works in the field. Field work also may be encouraged for the students to recognize their social and environmental responsibility. Non-invasive and non-harmful practical exercises, for the study of Anatomy, Physiology, Ethology, Epidemiology and Ecology may be designed.

PRACTICAL'S

Scheme of practical Examination

Total Marks- 300

Total Duration: 2 days
(5 hrs. per day)

I Day (I, II & III Papers)

Time: 5 hrs.

Max Marks: 150

Marks

1. Anatomy		
a. Major		8
b. Minor		5
2. Biodiversity Study		15
3. Spotting No. 1 - 8 (8× 4)		32
4. Cell & Molecular Biology & Biotechnology		15+15
5. Practical Record		20
6. Viva-Voce		20
7. Seminar		20
		Total = 150

II Day (IV, V & VI Papers)

Time- 5 hrs.

Max Marks: 150

Marks

1. Gen. Physiology}Major & Minor		20+5
2. Biochemistry }Major & Minor		20+5
3. Population Genetics & Statistical methods		20
4. Spotting (1 to 5) (5× 4)		20
5. Practical Record		20
6. Viva-voce		20
7. Seminar		20
		Total = 150

Notes:

1. With reference to study of anatomy and museum specimens, candidates must be well versed in the study of various systems with the help of charts/models/CD-ROMs, multimedia computer based simulations including computer assisted learning (CAL) and other softwares.
2. With reference to permanent preparations and microscopic slides, the exercise may be substituted with diagrams/photographs/models/charts etc.
3. Candidates must keep a record of all work done in the practical class and submit the same for inspection at the time of the practical examination.
4. The candidates may be asked to write detailed methodology wherever necessary and separate marks may be allocated for the same.
5. Mounting material for permanent preparations would be as per the syllabus or as available through collection and culture methods.
6. **It should be ensured that animals used in the practical exercise are not covered under the wildlife Protection Act 1972 and amendments made subsequently.**

UNIVERSITY OF RAJASTHAN, JAIPUR

SCHEME OF EXAMINATION

M.Sc. ZOOLOGY

(Annual Scheme)

Each Theory Paper	100 Marks
Dissertation/Thesis	3 hrs. duration
Survey Report/Field Work, if any	100 Marks

- The Ordinance governing the examinations in the Faculties of Arts, Fine Arts, Social Sciences, Science, Commerce and Law are contained in a separate booklet. The students are advised to refer to the same.
- Changes in Statutes/Ordinances/Rules/Regulations/Syllabi and Books may, from time to time, be made by amendment or re-making and a candidate shall, except in so far as the University determines otherwise comply with any change that applies to years he has not completed at the time of change.
- All court cases shall be subject to the jurisdiction of the Rajasthan University head quarter at Jaipur only and not any other place.

NOTICE

- The Ordinance governing the examinations in the Faculties of Arts, Fine Arts, Social Sciences, Science, Commerce and Law are contained in a separate booklet. The students are advised to refer to the same.
- Changes in Statutes/Ordinances/Rules/Regulations/Syllabi and Books may, from time to time, be made by amendment or re-making and a candidate shall, except in so far as the University determines otherwise comply with any change that applies to years he has not completed at the time of change.
- All court cases shall be subject to the jurisdiction of the Rajasthan University head quarter at Jaipur only and not any other place.

- The Number of papers and the maximum marks for each paper and practical shall be shown in the syllabus for the subject concerned. It will be necessary for a candidate to pass in the theory as well as in practical part of a subject/paper separately.
- A candidate for a pass at each of the previous and the final Examinations shall be required to obtain (i) at least 36% marks in the aggregate of all the papers prescribed for the examination and (ii) at least 36% marks in practical(s), wherever prescribed at the examination, provided that if a candidate fails to secure at least 25% marks in each individual paper at the examination and also in the dissertation/Survey report/field work, wherever prescribed, he shall be deemed to have failed at the examination notwithstanding his having obtained the minimum percentage of marks required in the aggregate for that examination. No division will be awarded at the previous examination. Division shall be awarded at the end of the final examination on the combined marks obtained at the previous and the final examination taken together, as noted below.
- First Division 60% } of the aggregate marks taken together
Second Division 48% } of the previous and the final examination
- All the rest will be declared to have passed the examinations.
- If a candidate clears any Paper(s) Practical(s)/Dissertation prescribed at the previous and/or final examinations after a continuous period of three years, then for the purpose of working out his division the minimum pass marks only viz. 25% (36% in the case of practical) shall be taken into account in respect of such Paper(s)/Practical(s). Dissertation are cleared after the examination of the aforesaid period of three years; provided that in

UGC CURRICULUM FOR POSTGRADUATES

else where a candidate may secure marks in order to reach the minimum aggregate required of these actually secured by him to make him eligible for the minimum aggregate.

The Thesis/Dissertation/Survey Report shall be typed written and submitted in triplicate so as to be received by the registrar at least 3 weeks before the date of the theory examinations. Only such candidates shall be permitted to offer Dissertation/Field Work/Survey Report/Dissertation in the scheme of examination) in lieu of a paper as may be required at least 55% marks in the aggregate of all the papers described for the previous examination in case of annual scheme irrespective of the number of papers in which a candidate actually appeared at the examination.

N.B. Non-collegiate candidates are not eligible to offer dissertation as per provisions of O.I.T.O.A

M.Sc. PREVIOUS (ANNUAL SCHEME)

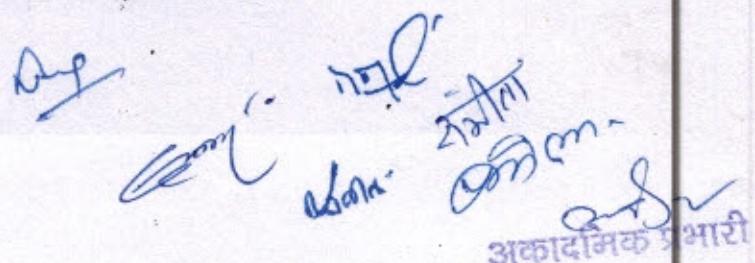

Paper - I	Biosystematics and Taxonomy
Paper - II	Structure & Function of Invertebrates
Paper - III	Molecular Biology and Biotechnology
Paper - IV	General Physiology
Paper - V	Biochemistry
Paper - VI	Quantitative Biology and Population Genetics
	Laboratory Exercises
	Demonstration and Tutorials

Note:- In M. Sc. Zoology Previous Examination the theory papers will have the following pattern.

- Question papers will have 5 (five) questions in all having equal marks
- Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.
 - Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.
 - Question numbers 4 and 5 will be long answer type questions with internal choice.

PAPER-I : BIOSYSTEMATICS AND TAXONOMY
3 Hours Duration **Max. Marks: 100** **Periods : 80**
Theory Paper will have the following pattern.
Question paper will have 5 (five) questions, having 20 marks each.

- Question number 1 will be compulsory and will have 20 very short answer questions of 1 mark each.
 - Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.
 - Question numbers 4 and 5 will be long answer type questions with internal choice.
- Definition and basic concepts of biosystematics and taxonomy. 10
 1.1 Historical resume of systematics.
 1.2 Importance and applications of biosystematics in biology.

 अकादमिक प्रभारी

1.3 Manual basis of histo-systematics-different attributes.	
2. Trends in biosystematics: Concepts of different conventional and newer aspects	14
2.1 Chemotaxonomy	
2.2 Cytotaxonomy	
2.3 Molecular taxonomy	
3. Molecular perspective on the conservation of diversity	6
3.1 Diversity and ecosystem process: Theory, achievements and future directions.	
4. Dimensions of speciation and taxonomic characters	20
4.1 Dimensions of speciation—Types of lineage changes: production of additional lineage.	
4.2 Mechanisms of speciation in panmixic and apomixic species.	
4.3 Species concepts and species category. Different species concepts: subspecies and other infra-specific categories.	
4.4 Theories of biological classification: hierarchy of categories.	
4.5 Taxonomic characters of different kinds, origin of reproductive isolation and biological mechanism of genetic incompatibility.	
5. Procedure keys in taxonomy.	20
5.1 Taxonomic procedures: Taxonomic collections, preservation, correct process of identification.	
5.2 Taxonomic keys: Different kinds of taxonomic keys, their merits and demerits.	
5.3 Systematic publications and different kinds of publications	
5.4 Process of typification and different Zoological types.	
5.5 International Code of Zoological Nomenclature (ICZN) and its operative principles, interpretation and application of important rules. Zoological nomenclature; formation of Scientific names of various taxa.	
6. Evaluation of biodiversity indices	10
6.1 Shannon-Weinert index, dominance index.	
6.2 Similarity and dissimilarity index	
6.3 Association index

PAPER-II : STRUCTURE & FUNCTION OF INVERTEBRATES

3 Hours duration Max. Marks-100

Periods : 80
Note:- In M. Sc. Zoology Previous Examination the theory paper will have the following pattern.

Question paper will have 5 (five) questions in all having equal marks.

- (i) Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.
- (ii) Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.
- (iii) Question numbers 4 and 5 will be long answer type questions with internal choice.

1. Organization of Coelom

1.1 Acoelomates

1.2 Pseudocoelomates

1.3 Coelomates: Protostomia and Deuterostomia.

2. Locomotion

2.1 Flagellar and ciliary movement in Protozoa.

2.2 Hydrostatic movement in Coelenterata, Annelida and Echinodermata.

3. Nutrition and Digestion

3.1 Patterns of feeding and digestion in lower Metazoa.

3.2 Filter feeding in Polychaeta. Mollusca and Echinodermata.

4. Respiration

4.1 Organs of respiration: Gillis, lungs and trachea.

PAPER-V: BIOCHEMISTRY

Duration: 3 Hours Max. marks: 100 Periods: 80

Note : In M. Sc. Zoology Previous Examination the theory paper will have the following pattern.

Question paper will have 5 (five) questions in all having equal marks

Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.

Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.

Question numbers 4 and 5 will be long answer type questions with internal choice.

Covalest properties of Proteins

1. Structure and chemistry of amino acids

2. Protein sequencing

3. Peptide synthesis

- 1.4 Covalent modifications
- 1.5 Protein size and composition
- 1.6 Protein splicing
2. Protein secondary and tertiary structure
 - 2.1 Protein tertiary structure and folding patterns
 - 2.2 Common tertiary structural motifs.
 - 2.3 Role of packing constraints in tertiary structure patterns.
 - 2.4 Divergent vs. convergent evolution of similar structure.
3. Globular and fibrous proteins.
 - 3.1 Water and the hydrophobic effect.
 - 3.2 Tertiary and quaternary effect.
 - 3.3 Motifs in globular proteins.
 - 3.4 Properties of protein interiors and surfaces.
 - 3.5 Fibrous proteins.
 - 3.6 Structure of bone.
4. Protein folding and thermodynamics
 - 4.1 Protein folding and dynamics.
 - 4.2 Folding overview: The Levinthal paradox.
 - 4.3 Condensation and molten globules.
 - 4.4 Ramchandran plots and amino acid propensities.
 - 4.5 Catalysis and assistance.
 - 4.6 Amino acid sequence variation and membrane protein folding.
- 4.7 Chaperonin-assisted protein folding.
5. Allostery (Hemoglobin), Myoglobin structure and oxygen binding
 - 5.1 Hemoglobin subunits cooperativity, the Hill coefficient.
 - 5.2 Quaternary structure changes and Sickle cell and other molecular diseases.
6. Fats
 - 6.1 Fatty acids: structure, nomenclature, acyl glycerols, phospholipids, sphingolipids, glycolipids, lipoproteins.
 - 6.2 Terpenoids and sterols: structure, properties and function
 - 6.3 Function of lipids.
 - 6.4 Signal transducing molecules.
7. Vitamins

अकादमिक प्रभारी

7.1 Classification, occurrence of fat soluble vitamins.	5
7.2 Classification, occurrence and biological functions of thiamin, riboflavin, folic acid and B ₁₂ .	5
7.3 Phenolics and alkaloids: Structure, biological properties and functions.	5
8. Covalent properties of nucleic acids.	5
8.1 Modified nucleosides.	5
8.2 Properties of polynucleotides.	5
8.3 Secondary and tertiary structure.	5
9. Nucleic acid structure	5
9.1 Duplex stability.	5
9.2 Hybridization.	5
9.3 RNA structure.	5
9.4 Hairpin and pseudoknot structures, tRNA.	5
10. Nucleic acid structure	5
10.1 DNA and RNA helical geometrics (A-Z), banding, deformation triplexes, quadruplexes.	5
1. Nucleic acid analysis. DNA and RNA sequencing, determination of modified nucleotides. Analysis of nucleic acid secondary structure.	5
12. RNA catalysis	4
12.1 Chemistry and structure of ribozymes.	3
12.2 Evolutionary implications.	3
13. Enzyme mechanisms	8
13.1 Principles of enzyme catalysis.	8
13.2 Proteases and polymerases, other examples.	8
13.3 Coenzymes and Cofactors.	8
14. Inborn errors of metabolism.	5

PAPER-VI: QUANTATIVE BIOLOGY AND POPULATION GENETICS

DURATION: 3 Hours **Max. Marks :** 100 **Periods:** 80

Note:- In M. Sc. Zoology Previous Examination the theory paper

will have the following pattern.

The paper will have 5 (five) questions in all having equal marks

Question number 1 will be compulsory and will have 20 very

short answer question of 1 mark each.

Questions number 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be

internal choice in these questions.

iii. Question numbers 4 and 5 will be long answer type questions with internal choice.

Unit I : Quantitative Biology

1. Basic Mathematics for Biologists

1.1 Matrices and vectors.

1.2 Exponential functions.

1.3 Periodic functions.

1.4 Different equations, integration.

2. Principles and practice of statistical methods in biological research, samples and populations

अकादमिक प्रभारी

*Q. 1
प्र० 2
प्र० 3
प्र० 4
प्र० 5*

2.1 Basic statistics-average.	
2.2 Statistics of dispersion, coefficient of variation.	
2.3 Standard errors; Confidence limits.	
2.4 Probability distributions (binomial, Poisson and normal).	
2.5 Tests of statistical significance.	
2.6 Simple correlation of regression.	
2.7 Analysis of variance.	
Unit II : Population Genetics	
1. Concepts of evolution and theories of organic evolution with an emphasis on Darwinism.	5
2. Neo-Darwinism	10
2.1 Hardy-Weinberg's law of genetic equilibrium.	
2.2 detailed account of destabilizing forces -	
(i) Natural selection	
(ii) Mutation	
(iii) Genetic drift	
(iv) Migration	
(v) Meiotic drive	
2.3 Genetic structure of natural populations.	
2.4 Phenotypic variation:	
2.5 Models explaining changes in genetic structure of populations.	
2.6 Factors affecting human disease frequency.	
3. Molecular population genetics	
3.1 Patterns of change in nucleotide and amino acid sequences.	5
3.2 Ecological significance of molecular variations.	
3.3 Emergence of Non-Darwinism-Neutral hypothesis.	
4. Genetics of Quantitative traits in populations.	10
4.1 Analysis of quantitative traits.	
4.2 Quantitative traits and natural selection.	
4.3 Estimation of heritability.	
4.4 Genotype-environment interactions.	
4.5 Inbreeding depression and heterosis.	
4.6 Molecular analysis of quantitative traits.	
4.7 Phenotypic plasticity.	
5. Genetics of speciations	10
5.1 Phylogenetic and biological concept of species.	
5.2 Patterns and mechanisms of reproductive isolation.	
6. Molecular phylogenetics	
6.3 Models of specification (allopatric, sympatric, parapatric).	10
6. Molecular Evolution	
6.1 Gene evolution.	
6.2 Evolution of gene families, molecular drive.	
6.3 Assessment of molecular drive.	
6.4 Micro-and macro-evolution.	
7. Phylogenetic inference	12
7.1 Construction of phylogenetic trees.	
7.2 Phylogenetic inference-distance methods, parsimony methods, maximum likelihood method.	
7.3 Immunological techniques.	
7.4 Amino acid sequence and phylogeny.	
7.5 Nucleic acid phylogeny-DNA-DNA hybridizations, restriction enzyme sites, nucleotide sequence comparisons and homologies.	
7.6 Molecular clocks.

PRACTICAL EXERCISES -2017)

I. Anatomy:

a. Major:

1. **Leech:** Reproductive, excretory, nervous and haemocoelomic systems.
2. **Crab:** Nervous system.
3. **Scorpion:** Nervous and reproductive systems.
4. **Mollusca:** General anatomy of Aplysia and Nervous systems of Patella, *Lamellidens*, *Mytilus*, *Sepia* and *Aplysia*.

b. Minor:

5. C. S. of arm of Starfish.
6. General anatomy of Holothurians.
7. Aristotle's lantern of Sea urchin and disarticulated parts of Aristotle's lantern.

II. Museum Specimens: Identification, classification and distinguishing features of important representatives from various groups (Protozoa to Hemichordata).

III. Study of Permanent Preparations (Protozoa to Hemichordata):

Amoeba, *Entamoeba*, *Polystomella*, *Actinophryx*, *Euglena*, *Noctiluca*, *Volvox colony*, *Trypanosoma*, *Giardia*, *Opalina*, *Nyctotherus*, *Balantidium*, *Vorticella*, *Monocystis*, *Plasmodium*, *Sycon* T. S. and L.S., Gemmule, *Obelia* colony, *Obelia* medusa, *Aurelia* tentaculocytes, T. S. *Fasciola hepatica* sections through various regions of the body, *Hirundinaria* body sections through various regions, *Daphnia*, *Cypris*, *Cyclops*, T. S. Peripatus.

Larva: *Aurelia*-planula, *Redia*, *Cercaria*, *Meta-cercaria*, *Onchosphere*, *Cysticercus*, *Trochophore*, *Nauplius*, *Zoea*, *Mysis*, *Phyllosoma*, *Veliger*, *Glochidium*, *Bipinnaria*, *Ophiopluteus*, *Echinopluteus*, *Auricularia*, *Tornaria*.

IV. Biological Chemistry:

- (i) Identification of protein, carbohydrate and lipid in various tissues/body fluids/food material.
- (ii) Identification of different kinds of mono-, di- and poly-saccharides in biological and chemical materials.
- (iii) Verification of Beer-Lambert's Law.
- (iv) Quantitative estimation of the following in various tissues:
 - a) Carbohydrates: Glycogen, glucose.
 - b) Proteins: Total proteins.
 - c) Lipids: Phospholipids and cholesterol.
 - d) Nucleic acid: DNA and RNA.
 - e) Enzymes: Acid and alkaline phosphatases.

V. Physiology:

- (i) Study of the following with the help of Computer Assisted Learning (CAL) (please see E-pharm programme).
 - A. The effect of K^+ , Ca^{++} , acetylcholine and epinephrine on the isolated heart of frog and conclude your data with the graphic representation Computer Assisted Learning (CAL) be included.
 - B. The effect of various doses of acetylcholine and Nor-epinephrine on blood pressure, heart rate and respiratory rate of the rabbit.

C. The effects of Atropine Epinephrine, Ephedrine and Eserine on Rabbit's eyes. Other such exercises can be framed from the E-Phram software.

- (ii) Determination of blood pressure, pulse rate, heart beat and respiration rate.
- (iii) Photometric determination of hemoglobin in blood sample.
- (iv) Determine of MCV, MCH, MCHC and colour index of the given sample of blood.
- (v) Demonstration of the following in blood: Clotting time, erythrocyte sedimentation rate, haemolysis and crenation.
- (vi) Determination of the urea in urine/blood.
- (vii) Determination of the glucose in urine.
- (viii) Study of digestive enzymes in different parts of the alimentary canal.

VI. Cell & Molecular Biology & Biotechnology:

- (i) Squash and smear preparations of testis of cockroach and grasshopper, aceto-orecin, Fuelgen and Giemsa staining of these preparations.
- (ii) Study of mitosis in onion root tip.
- (iii) Study of giant chromosomes in the salivary gland of *Chironomus* or *Drosophila* larva.
- (iv) Vital and supravital staining (with neutral red and Janus Green B) of cells of the testis of any insect or mammal to study the mitochondria.
- (v) Chromosome counts in cells of the testis of an insect or mammal or cells of the bone marrow of a mammal.
- (vi) Study of prepared microscopic slides, including those showing various cell types, mitosis, meiosis and giant chromosomes.
- (vii) Paper chromatography: Unidimensional chromatography, using amino acids from purified samples and biological materials.
- (viii) Electrophoresis: Paper/Horizontal / Vertical – Proteins/DNA/ RNA.

VII. Genetics:

- (i) Culture of *Drosophila* and study of its life cycle.
- (ii) Identification of male and female *Drosophila*.
- (iii) Identification of wild and mutant forms of *Drosophila*.
- (iv) Monohybrid and dihybrid inheritance in *Drosophila*.
- (v) Simple problems based on Mendelism .
- (vi) Identifications of blood groups in humans.
- (vii) Demonstration of sex chromatin (Barr bodies).

VIII. Statistical Methods in Biology:

- (i) Preparation of frequency tables and graphs/line diagrams/bar diagrams/histogram/Pie charts.
- (ii) Calculation of standard deviation, variance and standard error of mean.
- (iii) Calculation of probability and significance between means using t-test and Chi-square test.
- (iv) Plotting the slope of a line on a graph; calculations of the slope of a line, coefficient correlation and regression.
- (v) Exercise based on population genetics.

OBSERVATIONAL AND FIELD STUDIES

There are unlimited amounts of alternative practicals that can be carried out using observational and other works in the field. Field work also may be encouraged for the students to recognize their social and environmental responsibility. Non-invasive and non-

PRACTICALS

Scheme of Practical Examination

Total Marks-200

Total Duration: 2 days
(5 hrs. per day)

I Day (I, II & III Papers)

Time: 5 hrs.

Max Marks: 100

Marks

1. Anatomy	
a. Major	6
b. Minor	4
2. Biodiversity Study	12
3. Spotting No. 1 – 8	24
4. Cell & Molecular Biology & Biotechnology	12+12
5. Practical Record	10
6. Viva-voce	10
7. Seminar	10

Total = 100

II Day (IV, V & VI Papers)

Time-5 hrs.

Max Marks: 100

Marks

1. Gen. Physiology	20
2. Biochemistry	20
3. Quantitative Biology & Population Genetics	15
4. Spotting (1 to 5)	15
5. Practical Record	10
6. Viva-voce	10
7. Seminar	10

Total = 100

Notes:

1. With reference to anatomy and study of museum specimens, candidates must be well versed in the study of various systems with the help of charts/models/CD-ROMs, multimedia computer based simulations including computer assisted learning (CAL) and other softwares.
2. With reference to permanent preparations and microscopic slides, the exercise may be substituted with diagrams/ photographs/ models/ charts etc.
3. Candidates must keep a record of all work done in the practical class and submit the same for inspection at the time of the practical examination.
4. The candidates may be asked to write detailed methodology wherever necessary and separate marks may be allocated for the same.
5. Mounting material for permanent preparations would be as per the syllabus or as available through collection and culture methods.
6. It should be ensured that animals used in the practical exercise are not covered under the Wildlife Act 1972 and amendments made subsequently.

M.Sc. FINAL (ZOOLOGY)

PAPER-II : ENVIRONMENTAL BIOLOGY

^{3 hours duration Max. Marks: 100}

^{Periods : 70}
Note:- The theory paper of M.Sc. Final (Zoology) will have the following pattern.

Question paper will have 5 (five) questions in all having equal marks.

- i. Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.
- ii. Question number 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.
- iii. Question numbers 4 and 5 will be long answer type questions with internal choice.

Unit I- Environmental Biology

1. Interactions between environment and biota
 - 1.1 Concept of habitat and ecological niches.
 - 1.2 Limiting factors.
 - 1.3 Energy flow, food chain, food web and trophic levels, ecological pyramids.
 - 1.4 Biotic community: Concept, structure, dominance, fluctuation and succession.
 - 1.5 Various nutrient cycles in nature.
2. Ecosystem dynamics and management
 - 2.1 Complexity, stability and homeostasis of ecosystems.
 - 2.2 Functional aspects and productivity concept.
 - 2.3 Niche, ecotone, and overlapping of niches.
 - 2.4 Character displacement, speciation and extinction.
3. Environmental impact assessment
 - 3.1 Environmental pollution.
 - 3.2 Population and impact of urbanization.
4. Principles of conservation: Conservation strategies
 - 4.1 Various natural resources.
 - 4.2 Present status and future needs.
 - 4.3 Management.
 - 4.4 Biodiversity of India and Rajasthan and their management.

અકાડમિક પ્રકારી

5.	Prospects and strategies for sustainable communities.	2
6.	Organisation and dynamics of ecological communities	7
6.1	The habitat approach.	
6.2	A detailed knowledge of communities of fresh water, marine, terrestrial and estuarine areas with respect to	
6.2.1	Extent,	
6.2.2	Zonation,	
6.2.3	Environment,	
6.2.4	Biota,	
6.2.5	Adaptations	
7.	The ecological outlook	5
7.1	Applied human ecology	
7.2	Radiation (electromagnetic and ionizing) and environment	
7.3	Climatic changes (El Nino and La Nina)	
7.4	Space ecology	
7.5	Human future	
Unit - II: Ethology		
1.	Introduction to the study of animal behaviour	
1.1	Aims of behavioural research	
1.2	Diversity of animal behaviour	
1.3	Ethology: Historical perspective	
1.4	Milestones in the study of animal behaviour	
2. Concepts of ethology		
2.1	Fixed action patterns	6
2.2	Action specific energy	
2.3	Sign stimulus	
2.4	Innate releasing mechanism	
2.5	Learning and imprinting.	
3. Proximate mechanisms in behaviour / neuroethology		
3.1	Introduction to neuroethology : Cellular mechanisms in behaviour	6
3.2	Neural basis of sensory perception	
3.3	Central neural processing	
3.4	Neural basis of motor responses	
3.5	Brain and behaviour	
3.6	Behavioural endocrinology	
4.	Ultimate mechanisms in behaviour and behavioural ecology	6
4.1	Example of agonistic interactions among conspecifics

PAPER-III : GENES AND DIFFERENTIATION

3 Hours Duration Max. Marks 100 Periods : 70

Note:- The theory paper of M.Sc. Final (Zoology) will have the following pattern.

Question paper will have 5 (five) questions in all having equal marks.

- i. Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.

- ii. Question number 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.

- a. Introduction to animal development. 7

- 1.1 Problems of developmental biology.

- 1.2 Developmental patterns in metazoans.

- 1.3 Development in unicellular eukaryotes.

2. Creating multicellularity. 5

- 2.1 Cleavage types.

- 2.2 Comparative account of gastrulation.

3. Early Vertebrate development. 6

- 3.1 Neurulation and ectoderm.

- 3.2 Mesoderm and endoderm.

4. Cytoplasmic determinants and autonomous cell specification 8

- 4.1 Cell commitment and differentiation.

- 4.2 Cell specifications in nematodes

- 4.3 Germ cell determinants.

- 4.4 Germ cell migration.

- 4.5 Progressive cell-cell interaction and cell specification fate. 5

- 5.1 Establishment of body axes in mammals and birds.

- 5.2 Proximate tissue interactions.

- 5.3 Genetics of axis specifications in drosophila.

- Homeobox concept in different phylogenetic groups.

- Tetrapod limb development.

- Hormones as mediators of development.

- Amphibian metamorphosis.

- Insect metamorphosis.

- Ovarian luteinization and mammary gland differentiation.

- Environmental evolution and animal development

- Environmental cues and effects.

- Malformations and disruptions.

- Changing evolution through development modularity.

- Developmental constraints.

- Creating new cell types-basic evolutionary mystery.

- Biology of sex determination

- 10.1 Chromosomal sex determination - Mammals and Drosophila.

- 10.2 Testis determination genes.

- 10.3 Ovarian development.

10.4 Secondary sex determination in mammals.

10.5 Environmental sex determination.

11. Cell diversification in early embryo

11.1 Xenopus blastomeres.

11.2 Morphogen gradients.

11.3 Totipotency & Pluripotency.

11.4 Embryonic stem cells.

11.5 Renewal by stem cells-epidermis.

11.6 Skeletal muscle regeneration.

11.7 Connective tissue cell family.

12. Hemopoietic stem cells

12.1 Stem cell disorders.

12.2 Blood cell formation.

12.3 Bone marrow transplants.

12.4 Gene therapy.

PAPER-IV : TOOLS AND TECHNIQUES IN BIOLOGY

3 Hours Duration Max. Marks 100 Periods : 70

Question paper will have 5 (five) questions in all having equal marks.

- Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.

- Question number 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.

- Question numbers 4 and 5 will be long answer type questions with internal choice.

Section A : Tools

- Principles and application of
 - Light Microscopy and micrometry.
 - Phase contrast microscopy.
 - Interference microscopy.
 - Polarized microscopy.

Section A : Tools

10

- Principles and application of
 - Light Microscopy and micrometry.
 - Phase contrast microscopy.
 - Interference microscopy.
 - Polarized microscopy.

1.5 Fluorescence & epifluorescence microscopy.

1.6 Transmission electron microscopy.

1.7 Scanning electron microscopy.

1.8 Confocal scanning and deconvolution microscopy.

2. Principles and application of

2.1 Ultracentrifugation: Differential and density gradient.

2.2 Electrophoresis: Various media for electrophoresis and various types such as paper, agarose, PAGE, submerged DNA

electrophoresis, pulse chase electrophoresis, isoelectrofocusing points and capillary electrophoresis.

2.3 Chromatography: various types such as paper, TLC, GLC, HPLC, ion-exchange and affinity chromatography.

2.4 Freeze techniques; freeze-drying, freeze substitution, freeze fracture and freeze itch.

2.5 X-Diffraction.

2.6 Lambert-Beer's Law and colorimetry & spectrophotometry

fluorescence, U.V., N.M.R., O.R.D./C.D., ESR, I.R., Atomic absorption, plasma emission spectrophotometry.

2.7 Flow cytometry/Fluorescence activated cell sorter.

Principles and application of radiation techniques in Biology 10

3.1 Radiation dosimetry.

3.2 Radioisotopes and half life of isotopes.

3.3 Tracer techniques in biology.

3.4 Cerenkov radiation.

3.5 Liquid scintillation.

3.6 Autoradiography.

Section B : Techniques

Assay 2

12 Definition and criteria of reliability.

13 Chemical assays.

13 Biological assays-in vivo and in vitro assays.

2. Principles of cytological and cytochemical techniques

2.1 Fixation, chemical basis of fixation by formaldehyde,

glutaraldehyde, chromium salts, mercury salts, osmium

reducing salts, alcohol and acetone.

2.2 Chemical basis of staining of carbohydrates, proteins, lipids and nucleic acids.

Principles and techniques of

- N
- 3.1 Nucleic acid hybridization and slot curve.
 - 3.2 Sequencing of proteins and nucleic acids.
 - 3.3 Blotting techniques (Southern, Northern and Western).
 - 3.4 Dot and Slot blots.
 - 3.5 Biotinylated DNA probe.
 - 3.6 Polymerase chain reaction (PCR).
 - 3.7 Screening of genomic and cDNA libraries.
 - 4. Principles and techniques of genetic engineering
 - 4.1 Basic techniques.
 - 4.2 Cutting and joining of DNA molecules.
 - 4.3 Changing genes: site-directed mutagenesis.
 - 4.4 Analysis of DNA sequences.
 - 4.5 Cloning strategies, gene library and cDNAs.
 - 4.6 DNA transformation techniques and their application in agriculture, health, medicine and industry.
 - 4.7 Introducing genes in animal cells.
 - 4.8 Application of recombinant DNA technology.
 - (a) Recombination, selection, and screening.
 - (b) Nucleic acid probes and their application.
 - (c) Impact of recombinant technology.
 - 4.9 Hybridoma technology.
 - 4.10 Transgenic animals.
 - 5. Embryo technology
 - 5.1 Superovulation, cryopreservation of spermatozoa.
 - 5.2 *In Vitro* fertilization.
 - 5.3 Embryo sexing.
 - 5.4 Chimera formation.
 - 5.5 Gene transfer through embryo transgenesis.
 - 5.6 Embryo transfer.
 - 5.7 Assisted reproductive technologies.
 - 5.8 Prenatal diagnosis and genetic counselling.
 - 6. Cell Culture techniques
 - 6.1 Design and functioning of tissue culture laboratory.
 - 6.2 Cell proliferation measurements.
 - 6.3 Cell viability testing.
 - 6.4 Culture media preparation and cell harvesting methods.
 - 7. Cryotechniques
 - 7.1 Cryopreservations for microscopy.

7.2 Cyrotechniques for microscopy

M.Sc. Final : List of Practical Contents (General)

~~Dissections~~

~~(a) Major dissections~~

(i) Cranial nerves of *Wallago attu*.

(ii) Cranial nerves of *Rana tigrina*

(iii) Neck nerves of Rat

(iv) Reproductive organs of Rat

~~(b) Minor dissections~~

(i) Accessory respiratory organs of *Hereropterus fossilis*

(ii) Labrithin organs of *Anabas testudineus*

(iii) Internal ear of *Scoliodon*

Museum Specimens

Lower Chordates : *Salpa* asexual and sexual stage Dolioium

oozoid, *Bryozoas*, *Herdmania*, *Amphioxus*

Petromyzon, *Myxine*, *Rhinobatus*, *Prisces*,

Trygon, *Chimaera*, *Polydon*, *Acipenser*,

Amia, *Lepidostere*, *Protopterus*,

Lepidosiren, *Neoceratodus*, *Notopterus*,

Exocoetus, *Echeneis*, *Pleuronectes*,

Mesistacembelus, *Diodon*, *Tetradon*,

Ostracion, *Lophis*, *Syngnathus*, *Tetraodon*,

Hippocampus, *Anguilla*, *Syngnathus*, *Labeo*,

Ophiocephalus.

Ichthyophis, *Necturus*, *Proteus*, *Ambystoma*,

Axolotl, *Salamander*, *Siren*, *Alytes*, *Pipa*,

Bufo, *Hyla*, *Rhacophorus*, *Rana*.

: *Testudo*, *Chelone*, *Sphenodon*, *Calotes*,

Hemidactylus, *Phrynosoma*, *Dryoco*, *Karanas*,

Chameleon, *Cobra*, *Hydrophis*, *Krait*, snake, *Un-*

Viper, Pit viper, Krait, Eryx, Gavialis.

University of Rajasthan

M.Sc. (Final) Zoology (2018)

PRACTICALS

General Papers:

- I. Anatomy
- (a) Major
 - (i) Cranial nerves of *Wallago attu*.
 - (ii) Cervical nerves of Rat.
 - (iii) Reproductive organs of Rat.
 - (b) Minor
 - (i) Accessory respiratory organs of *Heteropneustes fossilis*.
 - (ii) Labrinth organs of *Anabas testudens*.
- II. Study of Museum Specimens/Models/Charts/Digital media
- Lower Chordates : Salpa: asexual and sexual stages, *Doliolum*- oozoid, *Botrylus*, *Herdmania*, *Amphioxus*
 - Pisces : *Petromyzon*, *Myxine*, *Rhinobatus*, *Pristis*, *Trygon*, *Chimaera*, *Polydon*, *Acipenser*, *Amia*, *Lepidosteus*, *Protopterus*, *Lepidosiren*, *Neoceratodus*, *Notopterus*, *Exocoetus*, *Echeneis*, *Pleuronectes*, *Mesacembelus*, *Diodon*, *Tetradon*, *Ostracion*, *Lophis*, *Syngnathus*, *Hippocampus*, *Anguilla*, *Labeo*, *Ophiocephalus*.
 - Amphibia : *Ichthyophis*, *Necturus*, *Proteus*, *Ambystoma*, *Axolotl*, *Salamander*, *Siren*, *Alytes*, *Pipa*, *Bufo*, *Hyla*, *Rhacophorus*, *Rana*.
 - Reptilia : *Testudo*, *Chelone*, *Sphenodon*, *Calotes*, *Hemidactylus*, *Phrynosoma*, *Draco*, *Varamus*, *Chameleon*, *Cobra*, *Hydrophis*, Rattle snake, Viper, Pit, Viper, Krait, Eryx, Gavialis.
 - Aves : *Archaeopteryx*, Tailor Bird, Indian Koel, Jungle fowl, Peacock, *Columba*, Parrot, Wood Pecker, Owl, Flamingo, Great Indian Bustard.
 - Mammals : *Ornithorhynchus*, *Echidna*, *Marcopus*, Hedgehog, *Manis*, Loris, Bat, Mongoose, Hystrix, Otter.
- III. Study of Microscopic slides:
- Lower chordates : *Herdmania* spicules, *Herdmania* tadpole larva, *Amphioxus*, T. S. passing through oral hood, pharynx, testes and ovary, intestine and caudal regions. Ammocoete larva (whole mount).
 - Pisces : Placoid scale, cycloid scale, ctenoid scale.
 - Amphibia : V. S. skin of frog, T. S. passing through stomach, duodenum, intestine, liver, pancreas, lung, kidney, testis, ovary, spinal cord, bone.
 - Reptilia : V. S. skin of lizard.
 - Aves : V. S. skin of bird, contour feather, down feather.

Mammals : V. S. skin of mammal, T. S. passing through stomach, intestine, liver, pancreas, kidney, testes, ovary, thyroid gland, adrenal gland, lung, bone and spinal cord, L.S./T.S. of pituitary gland; T. S. of simple cuboidal epithelium, simple columnar epithelium, simple squamous epithelium, adipose tissue and reticular tissues; Blood smear.

IV. Comparative Osteology (Models/Charts/Diagrams):

Comparative account of axial and appendicular skeletons of Frog, Varanus, Fowl and Rabbit (both articulated and disarticulated with the help of models, artificial skeleton and bones).

V. Tools and Techniques

- (i) Operations of various types of microscopes.
- (ii) Use of Phase-contrast microscope.
- (iii) Use of Fluorescence microscope and demonstration of nucleic acid by acridine orange or ethidium bromide.
- (iv) Preparation of tissue for TEM.
- (v) Tissue homogenization and fractionation by differential centrifugation for isolation of mitochondria, nucleic acids and cytosol and use of marker enzymes for assessment of the purity of the components.
- (vi) Demonstration of GLC, atomic absorption spectrophotometer, CASA etc.
- (vii) Standardisation of oculometer and measurements of tubular diameter, cell heights, nuclear diameters, etc.

VI. Exercises on Environmental Biology, Ethology and Developmental Biology can be framed as per the syllabus of the theory paper and infrastructure of the Department.

**Practicals (M.Sc. Final, General Paper)
Scheme of Practical Examination**

Duration: 5 hrs.	Max. Marks: 100
Exercise	Marks
1. Anatomy	
a. Major	5
b. Minor	2
2. Ethology	9
3. Environmental Biology	10
4. Tools and Techniques	10
5. Embryology	10
6. Spotting (No 1-8)	24
7. Practical record	10
8. Viva-voce	10
9. Seminar	10
	Total = 100

अकादमिक प्रभारी

Notes:

1. With reference to anatomy and study of museum specimens, candidates must be well versed in the study of various systems with the help of charts/models/CD-ROMs, multimedia computer based simulations including computer assisted learning (CAL) and other softwares.
2. With reference to permanent preparations and microscopic slides, in case of non-availability, the exercise should be substituted with diagrams/ photographs/ models/ charts etc.
3. Candidates must keep a record of all work done in the practical class and submit the same for inspection at the time of the practical examination.
4. The candidates may be asked to write detailed methodology wherever necessary and separate marks may be allocated for the same.
5. Mounting material for permanent preparations would be as per the syllabus or as available through collection and culture methods.
6. It should be ensured that animals used in the practical exercise are not covered under the Wildlife Act 1972 and amendments made subsequently.

अकादमिक प्रभारी

नहीं है।

class and it will be submitted for inspection at the time of the practical examination.

4. The detailed methodology may be asked to write wherever necessary and separate marks may be allocated for it.

Special Paper for M.Sc. Zoology (Final)

Candidate can opt any one special paper out of the following:

1. Cancer Biology
2. Cell and Molecular Biology
3. Developmental Biology
4. Endocrinology
5. Entomology
6. Environmental Biology
7. Fish Biology
8. Radiation Biology
9. Reproductive Biology

1. CANCER BIOLOGY

PAPER-V: NATURE OF CANCER

3 Hours Duration Max. Marks 100 Periods: 90

Note:- The theory paper of M.Sc. Final (Zoology) will have the following pattern.

Question paper will have 5 (five) questions in all having equal marks.

- i. Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.
- ii. Question number 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.
- iii. Question numbers 4 and 5 will be long answer type questions with internal choice.

1. Introduction: Cancer as a cellular disease.

- 1.1 Historical perspectives.
- 1.2 Cancer causation.
- 1.3 Cancer biology.

- 1.4 Cancer treatment.
- 1.5 Death due to cancer.

2. Occurrence of cancer.

- 2.1 Present day status of cancer in India.
- 2.2 Status of cancer occurrence in different parts of the world.
- 2.3 Cancer of different sex.
- 2.4 Cancer of different age groups.

3. Tumor classification.
 - 3.1 Benign and malignant tumors.
 - 3.2 Sarcoma and carcinoma.
 - 3.3 Leukemia and lymphoma.
 - 3.4 Ascites tumors.
 - 3.5 Teratocarcinoma.

4. Etiology of cancer
 - 4.1 Staging and grading of cancer.
 - 4.2 In vitro cell transformation.
 - 4.3 Apoptosis.

5. Cancer cell:
 - 5.1 Structural and ultrastructural profiles.
 - 5.2 Biochemical properties.
 - 5.3 Behavioural properties.

6. Genetic basis of cancer:
 - 6.1 Basic concepts of cancer genetics.
 - 6.2 Relationship between cancer incidence and age.
 - 6.3 Cellular and genetic basis of cancer.
 - 6.4 Types of genetic risk factors for cancer.
 - 6.5 Chromosomal abnormalities in tumor.
 - 6.6 Heritable cancer and tumor suppressors.
 - 6.7 Cancer cell growth patterns and cell kinetics

- 7.1 Tumor growth.
- 7.2 Cell cycle.
- 7.3 Cell proliferation in tumor tissue.
- 7.4 Experimental tumors.
 - 7.5 Human tumors.
 - 7.6 Cell proliferation, prognosis and therapies.

- 8.1 Introduction.
- 8.2 Metastatic process.
- 8.3 Metastatic ability of tumor cell population.
- 8.4 Properties of metastatic cells.
- 8.5 Genetic basis of metastasis.

Paper-VI: CAUSATION, PREVENTION AND CURE OF CANCER

3 Hours Duration Max. Marks 100 Periods : 90

Note: The theory paper of M.Sc. Final (Zoology) will have the following pattern.

Question paper will have 5 (five) questions in all having equal marks

- Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.
- Question number 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.
- Question numbers 4 and 5 will be long answer type questions with internal choice.

1. Introduction:

- Historical aspects.
- Environmental factors and cancer.
 - Tobacco, Alcohol, diets, occupational exposures, hormones and other exposure.
- Specific types of cancer: Hepatocellular carcinoma, Melanoma, Breast cancer, lung cancer.

2. Causation of cancer:

- Hereditary cancer.
 - Introduction.
 - Xeroderma pigmentosum.
 - Fanconi's Anemia.
 - Bloom syndrome.
 - Ataxia telangiectasia.
 - Retinoblastoma.
- Virus and cancer.
 - Introduction.
 - Viruses and oncogenes.
 - Historical perspectives.
 - Tumor virus and human cancer.
 - Retroviruses.
 - DNA tumor viruses.
 - Chemical carcinogenesis.
 - Activation of oncogenes.

2.3.2 Biological characteristics of chemical carcinogenesis.

2.3.3 Initiation, promotion and progression of carcinogenesis.

2.3.4 Assay methods for chemical carcinogens.

2.3.5 Chemical carcinogens in human cancer causation.

Radiation carcinogenesis.

2.4.1 Cell transformation.

2.4.2 Mechanism of radiation cell transformation.

2.4.3 Radiation carcinogenesis in animals.

2.4.4 Human data on radiation carcinogenesis.

Hormones and cancer.

2.5.1 Introduction.

2.5.2 Hormone production by tumors.

2.5.3 Hormone and cancer causation.

2.5.4 Hormones and cancer treatment.

Nutrition and cancer.

Cancer risks from naturally occurring carcinogens in food, food contaminants, additives.

3.2 Micronutrients in diet: Protein, carbohydrate, fat, fibers.

3.3 Micronutrients in diet: Mineral, salts, green yellow vegetables, fruits.

Therapy of cancer.

4.1 Surgical removal.

4.2 Chemotherapy.

4.3 Radiotherapy.

4.4 Immunotherapy.

4.5 Hyperthermia.

4.6 Management of therapy of cancer.

Prevention of cancer.

5. Primary prevention: Education, motivation and legislation.

5. Secondary prevention.

5.2.1 Detection of precancerous and early cancerous lesions in body.

5.2.2 Chemoprevention.

Oncogenes:

6.1 Introduction.

6.2 Defection of oncogenes in human cancer cells.

6.3 Activation of oncogenes.

2.3.6 Biological characteristics of chemical carcinogenesis.

2.3.7 Assay methods for chemical carcinogens.

2.3.8 Chemical carcinogens in human cancer causation.

Radiation carcinogenesis.

2.4.1 Cell transformation.

2.4.2 Mechanism of radiation cell transformation.

2.4.3 Radiation carcinogenesis in animals.

2.4.4 Human data on radiation carcinogenesis.

Hormones and cancer.

2.5.1 Introduction.

2.5.2 Hormone production by tumors.

2.5.3 Hormone and cancer causation.

2.5.4 Hormones and cancer treatment.

Nutrition and cancer.

Cancer risks from naturally occurring carcinogens in food, food contaminants, additives.

3.2 Micronutrients in diet: Protein, carbohydrate, fat, fibers.

3.3 Micronutrients in diet: Mineral, salts, green yellow vegetables, fruits.

Therapy of cancer.

4.1 Surgical removal.

4.2 Chemotherapy.

4.3 Radiotherapy.

4.4 Immunotherapy.

4.5 Hyperthermia.

4.6 Management of therapy of cancer.

Prevention of cancer.

5. Primary prevention: Education, motivation and legislation.

5. Secondary prevention.

5.2.1 Detection of precancerous and early cancerous lesions in body.

5.2.2 Chemoprevention.

Oncogenes:

6.1 Introduction.

6.2 Defection of oncogenes in human cancer cells.

6.3 Activation of oncogenes.

6.4 Antioncogenes.

CANCER BIOLOGY

Time : 5 Hours

Scheme of practical Examination and Distribution of the marks:

- | | |
|---|-----|
| 1. Preparation and comments on chromosomal aberrations, induced by carcinogens. | 15 |
| 2. Preparation and comments on micronuclei induced by carcinogens. | 15 |
| 3. Microtomy and Pathological study | 20 |
| 4. Identification and comments on spots (10) : | 20 |
| Slides of cancer | 10 |
| 5. Viva-Voice | 10 |
| 6. Project work on Tumor induction in mice/rat.
+ one project seminar | 20 |
| Grand Total | 100 |

2. CELL AND MOLECULAR BIOLOGY

PAPER - V

Max. Marks 100

Periods : 90

Note:- The theory paper of M.Sc. Final (Zoology) will have the following pattern.

Question paper will have 5 (five) questions in all having equal marks

- Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.
- Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.
- Question numbers 4 and 5 will be long answer type questions with internal choice

I. Biomembranes

- Phospholipids; as main lipid constituents
- Cytosolic and exoplasmic face of biomembranes.
- Universality of biomembranes

1.3.1 Difference in phospholipid composition in two membrane leaflets.

1.4 Myosin

- Structure and mechanism of movement with actin
- Conformational changes in myosin during movement

1.3.2 Intrinsic and extrinsic proteins.

1.3.3 Integral and glycolipids.

1.3.4 Mobility of lipids and integral proteins in biomembrane.

1.3.5 Fluidity of biomembranes.

1.3.6 Cell Junctions (Gap, tight and desmosomes etc.)

2. Transport across cell membrane

Diffusion of small molecules.

Osmosis and water channels.

Unporter-catalyzed transport. Difference between uniporter-catalyzed transport and passive diffusion. GLUT-i transport and its kinetics.

Intracellular ion environment and membrane electric potential.

Active transport, P-class ion pumps, F-class and V-class ion pumps and ABC superfamily. Plasma membrane Ca²⁺-AT Pase pump, Muscle Ca²⁺-AT Pase pump and Na⁺-K⁺ AT Phase pump.

Cotransport by symportors and antiporters.

Transport across epithelia

Cytoskeleton:

Microfilaments

3.1.1 Actin cytoskeleton G-actin and F-actin and structural and functional polarity. Cortical actin network, erythrocytic cytoskeleton and platelet cytoskeleton.

3.1.2 Actin bundle support projecting fingers of membrane.

3.1.3 Dynamics of actin assembly Actin polymerization. Toxins effect on actin monomer - polymer equilibrium stabilization of actin filaments by actin capping protein. Movement by actin polymerization

- Intracellular bacterial and viral movements
- Actin polymerization at the leading edge of moving cells

1.4 Myosin

- Structure and mechanism of movement with actin

- Conformational changes in myosin during movement

3.2 Microtubules

3.2.1 Microtubules structure and microtubule assembly from organizing centers.

3.2.2 Microtubule dynamics.

3.2.3 Microtubule associated proteins (MAPs) and cross-linking of microtubules

3.3 Microtubules and mitosis

(a) Centrosome duplication.

(b) Kinetochore and force for poleward chromosome movement

(c) Organization of spindle pole and orientation of assembly

(d) Formation of poles and capture of chromosomes
Kinetochore and force of poleward chromosome movement

(e) Astral microtubules and cytokinesis

(f) Microtubules and plant cell formation.
Kinesin and Dynein.

3.5 Cell movements:

(a) Intracellular transport: Role of Kinesin and Dynein, microtubule tracks and intracellular membrane vesicles.

(b) Amoeboid movements.

(c) Second messengers and signal transduction pathways for coordination of migration of cells.

4. Cilia and Flagella

4.1 Structure and movements

(a) Sliding of outer doublet.

(b) Dynein sliding forces in axonemes.

(c) Dynein and exonemal bending.

(d) Dynein regulatory complex.

5. Cell-Cell Signalling

5.1 Endocrine, paracrine and autocrine signaling.

5.2 Receptor proteins- Cell surface receptors and intracellular receptors.

5.3 Cell surface receptors-G-protein coupled receptors, ion channel receptors, tyrosine kinase-linked receptors and receptors with intrinsic enzymatic activity.

5.4 Second messenger System - cAMP and IP₃, DAG.

MAP kinase pathways.

5.5 MAP kinase pathways.

5.6 Signaling from plasma membrane to nucleus (a) CREB links cAMP signals to transcription. (b) MAP kinase.

Signal - Mediated transport through Nuclear Pore

5.1 Nuclear Pore Complex.

5.2 Nuclear Exports signals and transport of cargo proteins from nucleus to cytosol.

5.3 Nuclear localization signals and transport of cargo proteins from cytoplasm to nucleus

5.4 Cell adhesion and communication.

5.5 Cadherin mediated Ca²⁺ dependent homophilic cell-cell adhesion.

5.6 N-CAMs mediate Ca²⁺ independent homophilic cell-cell adhesion.

5.7 Cadherin containing junctions connect cells.

5.8 Gap junctions and connexin.

5.9 Cell-matrix adhesion.

5.10 Integrins in cell matrix and cell-cell interaction.

5.11 Integrin and cell to substratum attachment.

5.12 Collagen-Basic structure and assembly.

5.13 Non-collagen components of extracellular matrix (Laminin, Fibronectin and cell surface proteoglycans).

5.14 Plant cell wall.

5.15 Auxin and cell expansion.

5.16 Cellulose, fibril synthesis and orientation.

5.17 Plasmodesmata

Cell cycle

5.18 Bacterial cell cycle (Helmstetier - Cooper or I+C+D model).

5.19 Cell partition and cytokinesis.

5.20 Eukaryotic cell cycle - G₁, S, G₂ and M phases.

5.21 Cell cycle and check points.

5.22 Molecular basis of cell cycle regulation.

5.23 Tumor cells and onset of cancer.

5.24 Proto-oncogenesis and tumor suppressor genes

5.25 Mutation causing loss of cell cycle.

10.4 Mutations affecting genome stability.

11. Aging: The biology of senescence

11.1 Maximum life span and life expectancy.

11.2 Causes of aging

- (a) General wear and tear and genetic instability.
- (b) Free radicals, oxidative damage and antioxidants.
- (c) Telomerases and aging.

12. Cell Death

12.1 Apoptosis and necrosis.

12.2 Apoptosis-its characteristics.

12.3 Genes involved in apoptosis.

12.4 Identification of apoptosis.

13. Molecular structure of genes and chromosomes

13.1 Molecular definition of gene.

13.2 Chromosomal organization of genes and non-coding DNA.

13.3 Mobile DNA.

13.4 Functional rearrangements in chromosomal DNA.

13.5 Organizing cellular DNA into chromosomes.

13.6 Morphological and functional elements of eukaryotic chromosomes.

14. Genetic analysis in cell biology

14.1 Mutation: Type and causes.

14.2 Isolation and analysis of mutants.

14.3 Genetic mapping of mutations.

14.4 Molecular cloning of genes defined by mutations.

14.5 Gene replacement and transgenic animals.

15. Regulation of Gene Expression

15.1 Operon concept.

15.2 Catabolic repression.

15.3 Positive and Negative regulation.

15.4 Inducers and corepressors.

15.5 Regulation by attenuation: *his* and *trp* operons

16. DNA binding proteins and gene regulation

16.1 DNA binding domains.

16.2 Homeodomain proteins.

16.3 Zinc finger proteins.

16.4 Winged-helix (Forked head) proteins.

16.5 Leucine-Zipper proteins.

16.6 Helix Loophelix proteins.

17. Protein sorting: Organelle biogenesis and protein synthesis.

17.1 Synthesis and targeting of mitochondrial and chloroplast proteins.

(a) General wear and tear and genetic instability.

(b) Free radicals, oxidative damage and antioxidants.

(c) Telomerases and aging.

18. Translocation of secretory proteins across the ER membrane.

18.1 Insertion of membrane proteins in the ER membrane.

18.2 Post-translation modifications in rER.

18.3 Secretory pathways.

18.4 Translocation of secretory proteins across the ER membrane.

18.5 Insertion of membrane proteins in the ER membrane.

18.6 Post-translation modifications in rER.

18.7 Protein glycosylation in ER and Golgi complex.

18.8 Golgi and Post-Golgi protein sorting and proteolytic processing.

18.9 Receptor-mediated endocytosis and sorting of internalized proteins.

18.10 Molecular mechanisms of vesicular traffic.

18.11 Question paper will have 5 (five) questions in all, having equal marks.

18.12 Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.

18.13 Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.

18.14 Question numbers 4 and 5 will be long answer type questions with internal choice.

CELL & MOLECULAR BIOLOGY

PAPER-VI

Hours Duration

Max Marks 100

Periods : 90

19. The theory paper of M.Sc. Final (Zoology) will have the following pattern.

Question paper will have 5 (five) questions in all, having equal marks.

Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.

Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.

Question numbers 4 and 5 will be long answer type questions with internal choice.

Molecular Immunology

20. Discovery of humoral and cellular immunity.

21. Early theory of immunity.

22. Components of immunity.

23. Innate (nonspecific) immunity.

24.1 Anatomic barrier.

24.2 Physiologic barriers.

25. Components of immunity.

26. Innate (nonspecific) immunity.

27.1 Anatomic barrier.

27.2 Physiologic barriers.

50

Unit 2

University of Rajasthan

Syllabus M.Sc. Zoology

- 1.4.4 Inflammatory barriers.
1.4.5 Collaboration between innate and adaptive immunity.

- 1.5 Adaptive (specific) immunity.
1.5.1 Cell of the immune system (B-lymphocytes, T lymphocytes and Antigen presenting cells).
1.5.2 Functions of humoral and cell-mediated immune responses.

- 1.5.3 Recognition of antigen by B-and T-lymphocytes.
1.5.4 Generation of lymphocyte specificity and diversities
1.5.5 Role of MHC
1.5.6 Processing and presentation of antigen.
1.5.7 Clonal selection of lymphocytes.
1.5.8 Cellular interactions required for generation of immune responses:

- a. Activation and proliferation of T-Helper cells
- b. Generation of Humoral immune response
- c. Generation of IgM

2. Cells and organs of immune system

- 2.1 Hematopoiesis
2.1.1 B-Lymphocytes, T-lymphocytes, Null, cells.
2.1.2 Mononuclear cells phagocytes (antimicrobial and cytotoxic activities: antigen processing and presentation, secretion of factors).

- 2.1.3 Granulocytic cells (Neutrophils, Eosinophils and Basophils).
2.1.4 Mast cells.
2.1.5 Dendritic cells.

2.2 Organs of immune system

- 2.2.1 Primary lymphoid organs (Thymus, bone marrow)
2.2.2 Lymphatic system.
2.2.3 Secondary lymphoid organs (Lymph nodes, spleen, mucosal associated lymphoid tissue, cutaneous associated lymphoid tissue).

3. Antigens

- 3.1 Immunogenicity versus antigenicity.
3.2 Factors that influence immunogenicity.

molecular size, chemical composition and heterogeneity, susceptibility to antigen processing and presentation).

- 3.2.2 Contribution of Biological system. (Genotype of the recipient animal, immunogen, dosage, and route of administration, adjuvant).

- 3.2.3 Heptans.

3. Immunoglobulins: Structure and function

- Molecular structure of Ig, Light chain and Heavy chain Immunoglobulin domains.

- 4.2.1 Variable region domains (CDRs and antigen binding, conformational changes included by antigen binding).

- 4.2.2 Constant region (CH and CL domains, hinge region and other constant region domains).

Immunoglobulin classes (IgG, IgM, IgA, IgE and IgD and their biological activities).

- Immunoglobulin-mediated effector functions (Opsonization, activation of complement, antibody dependent cell mediated cytotoxicity).

- 4.5 Antigenic determinants on immunoglobulin (isotype, allotype and idiotype).

4. Monoclonal antibodies

- 4.6.1 Formation and selection of hybrid cells.

- 4.6.2 Production of monoclonal antibodies.

- 4.6.3 Clinical uses of monoclonal antibodies.

- 4.6.4 Catalytic monoclonal antibodies (enzymes).

5. Organization and expression of Ig genes

- 5.1 Genetic model compatible with Ig structure.

- 5.1.1 Germ line and somatic variation models.

- 5.1.2 Two gene model of Dryer and Bennett.

- 5.1.3 Verification of Dryer and Bennett hypothesis.

5.2 Multigene organization of Ig genes

- 5.2.1 I-chain multigene family.

- 5.2.2 K-chain multigene family.

- 5.2.3 Heavy chain multigene family.

- Variable region gene rearrangement.

- 5.3.1 V-J rearrangements in light chain DNA.

- 5.3.2 V-D-J rearrangements in heavy chain DNA.

(52)

(51)

5.4 Mechanism of variable region DNA rearrangement.

5.4.1 Recombination signal sequences.

5.4.2 Enzymatic joining of gene segments.

5.4.3 Identification of Raf-1 and Raf-2 genes.

5.4.4 Defects in Ig gene rearrangements.

5.4.5 Productive and nonproductive rearrangement.

5.4.6 Allelic exclusions.

5.5 Generation and antibody diversity.

5.5.1 Multiple germ line V,D and J gene segments.

5.5.2 Combinatorial V-J and V-D-J Joining.

5.5.3 Junctional Flexibility.

5.5.4 P-addition and N-addition.

5.5.5 Association of heavy and light chain.

5.6 Class switching among constant region genes.

5.6.1 Expression of Ig genes

a. Differential RNA processing of heavy chain primary transcripts.

b. Expression of membrane of secreted Ig.

c. Simultaneous, assembly and secretion of IgM and IgD.

d. Synthesis, assembly and secretion of Ig.

5.6.2 Regulation of Ig gene transcription.

a. Effect of DNA rearrangement of transcription

b. Inhibition of Ig gene expression in T-cells.

5.6.3 Antibody genes and antibody engineering.

a. Chimeric and hybrid monoclonal antibodies.

b. Monoclonal antibodies constituted from Ig gene libraries.

6. Antigen - Antibody Interaction

6.1 Antibody affinity and avidity.

6.2 Cross reactivity.

6.3 Agglutination reactions.

6.4 Precipitation reaction.

6.5 Complements and complement fixation test.

7. Major histocompatibility complex.

7.1 General organization and inheritance of MHC.

7.1.1 Location and function of MHC regions

7.1.2 MHC haplotypes.

7.2 Major histocompatibility complex.

7.2.1 General organization and inheritance of MHC.

7.2.2 Function of MHC molecules.

7.2.3 Structure of MHC molecules.

7.1.3 Congenic MHC mouse strains.

7.2 MHC molecules and genes.

7.2.1 Structure of class I molecules.

7.2.2 Structure of class II molecules.

7.2.3 Organization of class I and II genes.

7.2.4 Peptide binding by MHC molecules.

7.2.5 Class III molecules.

Genomic maps of MHC genes.

7.3.1 Maps of class I MHC.

7.3.2 Maps of class II MHC.

7.3.3 Maps of class III MHC.

7.3.4 Cellular distribution of MHC molecules.

7.3.5 Regulation of MHC expression.

7.3.6 MHC and immune responsiveness.

7.3.7 MHC and diseases susceptibility.

Antigen Processing and Presentation

8.1 Role of antigen presenting cell.

8.1.1 Early evidence for the necessity of antigen processing.

8.1.2 Cells that function in antigen presentation.

8.2 Evidence for two processing and presentation pathways.

8.2.1 Endogenous antigens. The cytosolic pathways.

a. Peptide generation by proteasomes.

b. Peptide transport from the cytosol to RER.

c. Assembly of peptide with class I MHC molecules.

8.2.2 Exogenous antigens: The endocytic pathway.

a. Peptide generation in endocytic vesicles.

b. Transport of class II MHC molecules to endocytic vesicles.

c. Assembly of peptide with class II MHC molecules.

Presentation of nonpeptide bacterial antigens.

Cytokines

8.1 Properties of cytokines.

8.2 General structure of cytokines.

8.3 Function of cytokines.

8.4 Cytokines related diseases.

अकादमिक प्रभारी

(53)

9.4.1 Bacterial septic shock.

9.4.2 Bacterial toxic shock and similar diseases.

9.4.3 Lymphoid and myeloid cancers.

9.4.4 Chagas' diseases.

10.10. Immune system in health and diseases

10.1 Immune response to infectious diseases.

10.1.1 Viral infections.

a. Viral neutralization by humoral antibody.

b. Cell mediated antiviral mechanism.

c. Viral evasion of host defence mechanisms.

10.1.2 Bacterial infections.

a. Immune responses to extra-cellular and intracellular bacteria.

b. Bacterial evasion of host defense mechanism.

10.1.3 Protozoa and diseases.

10.1.4 Diseases caused by helminthes.

11. Vaccine

11.1 Active and passive immunization.

11.2 Designing vaccines for active immunization..

11.3 Whole organism vaccine.

11.3.1 Attenuated viral or bacterial vaccines.

11.3.2 Inactivated viral or bacterial vaccines.

11.4 Polysaccharide vaccines.

11.5 Recombinant vector vaccines.

11.6 DNA vaccines.

11.7 Synthetic peptide vaccines.

11.8 Multivalent peptide vaccines.

12. AIDS and other immunodeficiencies

13. Autoimmunity

13.1 Organ specific autoimmune diseases.

13.2 Systemic autoimmune diseases.

13.3 Proposed mechanisms for induction of autoimmunity.

14. Cancer and immune system

15. Transplantation immunology

16. Cellular Energies

16.1 Electron Transport and Oxidative Phosphorylation.

16.1.1 Proton Motive Force.

16.1.2 Electron flow.

16.1.3 Shuttling of electrons between ETC.

16.1.4 Reduction potentials of electron carriers.

16.1.5 Pumping protons out of the mitochondrial matrix.

16.1.6 ATP syntheses.

a. FoF1 complex and proton motive force.

b. Inner mitochondrial membrane transporters and proton motive force.

c. Regulation of mitochondrial oxidation rate.

16.1.7 Chemiosmotic mechanism of ATP formation and related experiments.

16.2 Photosynthesis.

16.2.1 Photosynthesis and thylakoid membrane.

16.2.2 Stages of photosynthesis.

16.2.3 Light absorption and charge separation across thylakoid membrane.

16.2.4 Molecular analysis of photosynthesis.

16.2.5 CO₂ metabolism during photosynthesis.

CELL & MOLECULAR BIOLOGY

LIST OF PRACTICALS

Operation of various microscopes
Use of phase contrast.

Use of fluorescence microscope and demonstration of nucleic acid by acridin orange or thymid bromide.

Use of transmission electron microscope.

Use of ocular micrometer-Standardization and measurements of cell height, nuclear diameters and tubular diameters.

Use of ocular grid- standardization and counting of cells microvilli in cross section or epithelium.

Preparation of biological tissues and sectioning for Baraffin wax histology by microtome.

Impression frozen by cryostat.

Ultrathin sectioning by ultratome.

Proteins
Carbohydrate (a) PAS method (b) Alcian blue method.

Proteins (a) Bromophenol blue method (b) Copper Ninyhydrin method.

Proteins (a) Phosphomolyblic acid method (b) Copper

अकादमिक प्रारंभी

56

55

- 3.4 Nucleic acid (a) Feulgen method (b) Methyl green-Pyronin method.

4. Biochemical methods

- 4.1 Determination of pK value of buffer.
- 4.2 Determination of absorption maximum of a solution.
- 4.3 Determination of relationship between absorption and various concentration of a solution using a colorimeter/spectrophotometer.
- 4.4 Preparation of standard curve for proteins, lipids, carbohydrates and enzymes.

- 4.5 Determination of optimum concentration of enzyme for kinetic studies.
- 4.6 Determination of Michaelis - Menten (KM) and V_{max} for an enzyme, by Thunier's method.
- 4.7 Quantitation of enzymes.

- 4.7.1 by end point techniques as exemplified by alkaline and acid phosphatase.
- 4.7.2 by substrate - left over technique as exemplified by LDH.
- 4.7.3 by turn over number as exemplified by GST

5. Fractionation

- 5.1 Tissue homogenization and fractionation by differential centrifugation for isolation of mitochondria, nuclei and cytosol and use of marker enzymes for assessment of purity of the components.
- 5.2 Fractionation of protein, RNA and DNA and their Quantification.

6. Separation techniques

- 6.1 Separation of proteins and DNA by agarose electrophoresis
- 6.2 Separation of proteins and isoenzymes on SDS-PAGE and PAGE.
- 6.3 Electroeluting of proteins DNA/RNA from electrophoretic gels.
- 6.4 Separation of amino acids by paper chromatography.
- 6.5 Separation of phospholipids by TLC.
- 6.6 Separation of haemoglobin by column chromatography and ultraldehydes.
- 7. Chromosomal techniques
- 7.1 Preparation of salivary gland chromosomes from Drosophila

Chironomus larva and stain with aceto-earthling/acetoercin/Feulgen:

- ② Preparation of mammalian chromosomes from bone marrow or testis and stain with Giemsa stain.

1. Immunization techniques

- ③ Emulsification with Freund's reagent.
 - 8.1.1 Preparation of emulsions with syringe method!
 - 8.1.2 Preparation of emulsion with double hubbed needle method.

2. Testing type of emulsion.

- ④ Absorption of soluble proteins on insoluble colloidal carrier.
 - 8.3.1 Alum precipitates.
 - 8.3.2 Alum hydroxide adjuvants.

3. Immunization route

- ⑤ Intradermal.
- ⑥ Subcutaneous.
- ⑦ Intramuscular.
- ⑧ Intrapertitoneal.
- ⑨ Intravenous.
- ⑩ Foot pad.

4. Bleeding schedules and collection of blood

- ⑪ Bleeding from ear.
- ⑫ Retro-orbital.
- ⑬ Cardiac puncture.
- ⑭ Branchial vein.
- ⑮ From external jugular vein.

5. Separation and preservation of serum

- ⑯ Liquid storage.
- ⑰ Using preservative.
 - 11.1.1 Using preservative.
 - 11.1.2 Sterilization.
 - 11.2 By freezing.
 - 11.3 By lyophilization.
- ⑱ Isolation of T and B cells from sensitized animals
- ⑲ From spleen.

6. Isolation of proteins

- ⑳ From lymph nodes.
- ㉑ From human blood rosette formation with sheep RBC.
- ㉒ Barriers of antibodies and antigens
- ㉓ Immunobilization of antibodies an antigenic proteins using ultraldehydes.

- 13.2 Immunoadsorption.
- 13.3 Dissociation of absorbed material from immunoabsorbents.
14. Quantitation of antibodies
 - 14.1 Precipitation techniques.
 - 14.2 Immunodiffusion method.
 - 14.3 Immunoelectrophoresis method.
15. Immunoassays: RIA, ELISA
16. Permanent slides (for spotting) : Thymus, lymph nodes, spleen, bone marrow, types of cells (squamous, cuboidal, columnar epithelial cells, blood cells, nerve cells, muscle cells; connective tissues of various types, adipose tissues, mitotic & meiotic chromosomes and their different phases; cancer cells of various types etc.)

SCHEME OF PRACTICAL EXAMINATION

Duration: 5 Hrs.

1. Exercise on Microtomy/ Cryostat/ Ultramicrotome Sectioning Marks: 100
- Exercise on Cytochemistry. 10
- Exercise on biochemical estimation. 10
- Exercise on Differential centrifugation/ chromatography/ electrophoresis. 10
- Exercise on immunology. 10
- Exercise on chromosomal preparation. 10
- Identification and comment (Spots-five, 4 marks each). 20
- Viva - voce 10
- Record 10

Total = 100

- 3. DEVELOPMENTAL BIOLOGY**
- PAPER-V: CONCEPTS OF EMBRYOLOGY**
- Duration : 3 Hrs. Max. Marks : 100 Periods : 90**
- Note:-** The theory paper of M.Sc. Final (Zoology) will have the following pattern.
- Question paper will have 5 (five) questions in all, having equal marks.
- Question numbers 1 will be compulsory and will have 20 very short answer question of 1 mark each.
- Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.
- Question numbers 4 and 5 will be long answer type questions with internal choice.
1. Theories of development.
2. Fundamental Problems of Developmental Biology.
3. Scope and application of Developmental Biology.
4. Patterns of reproduction.
5. Asexual; Sexual; reproductive habits and breeding cycles in Vertebrates.
6. Types of reproductive cycles in mammals.
7. Induced breeding in fish and frog.
8. Differentiation and its control.
9. Spermatogenesis:
- 1. Differentiation and growth of oocytes.
 - 2. Organization of egg.
 - 3. Cytoplasm and egg cortex.
 - 4. Origin of polarity and symmetry in eggs.
 - 5. Vitellogenesis.
10. Fertilization.
- 1. Ultrastructure; biochemistry and types of sperms.
 - 2. Capacitation.
 - 3. Cortical reaction of sperm.
 - 4. Acrosome reaction of egg.
 - 5. Sperm penetration into egg.
 - 6. Prevention of polyspermy.
 - 7. Activation of egg metabolism.
 - 8. Biochemistry of fertilization.
 - 9. Biology and viability of sperms and ova.
- 62

अकादमिक प्रभारी

6.11 Activation of gamete metabolism-early and late responses.

6.12 Parthenogenesis.

6.13 Artificial insemination.

6.14 Fusion of genetic material in mammals.

6.15 Fertilization in vitro.

6.16 Cultivation and re implantation and significance of this technique.

6.17 Control of human fertility.

6.18 Birth control.

6.19 Contraception.

6.19.1 Natural.

6.19.2 Barrier or mechanical contraceptives.

6.19.3 Method of contraception in human beings.

6.20 Artificial insemination in cattle.

6.21 Test tube baby; its advantages and disadvantages.

6.22 Cryopreservation of human embryos.

6.23 Gamete intra-fallopian transfer (GIFT).

7. Cleavage:

7.1 Role of nucleus.

7.2 Problem of DNA synthesis; energy requirements; biochemical changes; distribution of morphogenetic substances of egg and their role during cleavages

7.3 Characteristics and mechanism of cleavages.

8. Early embryonic development in selected non-chordates and chordates (with particular reference to the type of eggs; pattern of cleavages; blastulation; gastrulation; establishment of three germ layers and the basic body plan).

8.1.1 Coelenterate.

8.1.2 Ctenophora.

8.1.3 Platyhelminthes.

8.1.4 Annelida.

8.1.5 Mollusca.

8.1.6 Echinodermata.

8.1.7 Insecta.

8.2 Chordates (frog, chick and mammals).

8.3 Determination of embryonic axes and cell lineage in mammalian development.

8.4 Morphogenesis of limbs in vertebrates.

o Morphogenesis of apical ridge.

6.19.3 Trans determination in insect germinal discs

6.19.4 Ectodermal and mesodermal interactions in the

6.19.5 Graphical relationship of the resumptive areas in early stages of their constructions, utility; comparative topographical affinities of cells during development.

6.19.6 Embryos of

6.19.7 Amphioxus.

6.19.8 Fishes.

6.19.9 Amphibian.

6.19.10 Birds.

6.19.11 Mammals.

6.19.12 Mechanism of neural tubes formation.

6.19.13 Segregation of mesodermal and endodermal organ rudiments.

6.19.14 Determination :

6.19.15 Concept of prospective fates, potencies; progressive determination and differentiation mosaic and regulative eggs-a problem of determination.

6.19.16 Restriction of potencies in the germinal layers of amphibians and birds; cytoplasmic determination of germ cells in nematodes, drosophila and frog.

6.19.17 Cell and tissue interactions in development.

6.19.18 Primary embryonic induction.

6.19.19 Nature and regional specificity of induction. Methods of study and analysis of the phenomenon of neural induction.

6.19.20 Heterogeneous inducers.

6.19.21 Chemistry and properties of inducing substances

6.19.22 Competence.

6.19.23 Secondary and tertiary inductors.

6.19.24 8.1 Concept of organizer.

6.19.25 8.2 Evocation and Individuation.

6.19.26 8.3 Trans determination in insect germinal discs

6.19.27 Morphogenesis of limbs in vertebrates.

अकादमिक प्रभारी

(64)

16. Origin and development of nerve cells and nerve fibres, computer analysis of cellular interactions.
17. Gradients:
- 17.1 The concepts; child's hypothesis.
 - 17.2 Metabolic differences in embryonic cell.
 - 17.3 Biochemical gradients in sea-urchin eggs and their morphogenetic importance.
18. Morphogenetic fields.
- 18.1 The concepts; nature and temporal character of fields.
 - 18.2 Progressive determination within a field.
19. Segmentation of vertebrate embryo.
20. Development of ectodermal organs.
- 20.1 Brain.
 - 20.2 Neural crest and its derivatives.
 - 20.3 Skin.
 - 20.4 Scale and feather.
21. Development of mesodermal organs.
- 21.1 Heart.
 - 21.2 Kidney.
 - 21.3 Gonads.
 - 21.4 Reproductive ducts.
22. Development of endodermal organs.
- 22.1 Liver.
 - 22.2 Pancreas.
 - 22.3 Thymus.
23. Differentiation :
- 23.1 Definition and biochemical basis of differentiation.
 - 23.2 Structural and biochemical changes during differentiation of.
 - 23.2.1 Muscle.
 - 23.2.2 Cartilage.
 - 23.2.3 Pigment cells.
 - 23.2.4 Lens
 - 23.2.5 Fibres.
 - 23.2.6 Mammalian erythroid cells
 - 23.2.7 Epidermis.
- 23.3 Concept of stem cells and establishment of tissue specific pattern formation.
- 2.1.1 General and theoretical aspects of pattern formation.
- 2.1.2 Polarity.
- 2.1.3 Animal dominance.

- 23.4 Cell surface in morphogenesis.
- 23.5 Pattern formation.
- 23.6 Pattern formation.
- 23.7 Epidermis.
- 23.8 Concept of stem cells and establishment of tissue specific pattern formation.

- 2.1.5 Pattern formation in limb development in vertebrates

2.1.6 Feather pattern in birds and wing pattern in insects

2.1.7 Importance of retinoic acid in pattern formation in amphibia and birds.

3. Nuclear transplantation in amphibians and mammals.

3.2 Cloning.

3.3 Pleuripotency of somatic cells.

4. Role of nucleus and cytoplasm in development.

4.1 Molecular exchange between cytoplasm and nucleus.

4.2 Nuclear control of morphogenesis.

4.3 Nuclear transplantation between species.

4.4 Prevention of chromosomal diminution in the germ cells of *Ascaris* by cytoplasmic determinants.

5. Genetic interaction in cell differentiation.

6. Genetic control of development.

6.1 At transcriptional level.

6.2 At translational level.

6.3 Post-translational control.

6.4 Epigenetic modification of proteins.

6.5 Determination of embryonic axis.

6.6 Segmentation of larval body.

6.7 Homeotic genes.

7. Function of genes during development transgenic cells and organisms.

8. Gene interactions in development: Gene action; Homeobox.

9. Differential gene function during development.

9.1 Changing patterns of tissue specificity of protein synthesis.

9.2 Embryonic, fetal and adult hemoglobin.

9.3 Differential RNA synthesis.

10. Gene mutations affecting programmed cell death.

11. Homeotic mutations.

11.1 *Bombyx mori*.

11.2 Bithorax locus in *Drosophila*.

11.3 Antennapedia locus in *Drosophila*.

11.4 Relationship of developmental biology with genetics and evolution.

11.5 Ontogeny and phylogeny.

11.6 Morphological recapitulation of phylogeny in ontogeny.

12. Molecular recapitulation in ontogeny.

13. Urea cycle in vertebrate phylogeny and ontogeny.

14. Arboreal salamanders and frogs without tadpoles - heterochrony and morphological adaptation.

15. Diversity of modes of reproduction in frogs of temperate and tropical regions.

16. Mechanism of amphibian hetero-chrony.

17. Dermal mesodermal interactions in the morphogenesis of vertebrate.

18. The role of apical ridge.

19. Specification of the anterior-posterior limb axis.

20. Polarizing zones.

21. Role of cell death in morphogenesis.

22. Development of the terapod limb.

23. Cell death in formation of digits and joints.

24. Growth.

25. Dynamics of population growth.

26. Isometric and allometric.

27. Differential growth.

28. Physiological mechanism of growth.

29. Senescence.

30. Cellular basis of ageing.

31. Maximum life span and life expectancy.

32. Oxidative damage.

33. Mitochondrial genome damage.

34. Genetic basis of ageing.

35. Telomere shortening.

36. Theories of ageing.

37. Ageing of cells in vitro.

38. Environmental regulation of animal development.

39. Abnormal growth (Teratomas).

40. Teratology-types of abnormalities.

41. Genetic effects (pleiotropism, phenocopies, canalization, and inborn errors in metabolism).

42. Environmental effects.

43. Teratogenic agents (drugs, nutritional deficiencies, infections, ionizing radiation).

- 16.6 Retinoic acid as a teratogen.
16.7 Alcohol as a teratogen.
16.8 General mechanisms and mode of action of teratogen agents.
17. Embryological considerations in teratology.
18. Twinning.
19. Malignancy:
19.1 General characteristics and properties of cancer cells including structural and metabolic alterations in these cells.
19.2 Metaplasia and carcinogenic agents.
20. Embryonic adaptations:
20.1 Cleidoic eggs.
20.2 Development, structure and physiology of extra-embryonic membranes in amniotes.
20.3 Development, structure and physiology of placenta in Eutherian mammals.
21. Embryonic nutrition.
21.1 Yolk utilization by embryos of invertebrates and vertebrates
21.2 Fetal nutrition in mammals.
21.3 Placental physiology.
22. Metamorphosis:
22.1 Larval forms of non-chordates and chordates and their morphological transformation to adult form.
22.2 Morphogenetic changes during metamorphosis in insects and their hormonal control.
22.3 Morphological, biochemical and physiological changes during metamorphosis in amphibians and their hormonal control.
23. Regeneration:
23.1 Definition; characteristic of regeneration and its comparison with ontogenetic development.
23.2 Distribution of regenerative ability in animal kingdom.
23.3 Forms and patterns of regeneration.
23.4 Morphallaxis.
23.5 Epimorphosis.
23.6 Regeneration in Hydra.
23.7 Regeneration in Planaria.
- 23.8 Appendage regeneration in arthropods and its relation with molting and metamorphosis.
23.9 Heteromorphosis.
17. Autotomy.
17.1 Regeneration in vertebrates with special reference to morphological and histological study of this phenomenon on.
- 23.11.1 Tail regeneration.
23.11.2 Limb regeneration.
23.11.3 Wolffian lens regeneration.
2. Sources of cells for regeneration.
13 Dedifferentiation.
14 Wound healing.
15 Role of wound epidermis and the epidermal cap.
16 Blastula morphogenesis.
17 Distal transformation.
18 Role of nerves and hormones.
19 Pattern formation in blastula by retinoic acid-proximalization.
20 Homeotic transformation of tails into limbs.
21 Loss of regenerative ability in anuran larvae and adults and experimental attempts to restore it.
22. Regeneration in mammals.
Methods of preparation and utility of normal tables of embryo-larvae and larval developmental stages.
- PRACTICALS: DEVELOPMENTAL BIOLOGY**
1. Detailed study of early embryonic development of a fish, an amphibian, chick and a mammal through preserved materials; whole mounts and serial sections.
2. Study of morphogenesis and histogenesis of some selected organs such as limb, heart, eye, brain, etc. during embryonic and fetal development of vertebrates through preserved materials, whole mounts and sections.
3. Study of morphological and histological developments during tail and limb regeneration in any amphibian.

D

70

69

- Question numbers 4 and 5 will be long answer type questions
with internal choice
4. Study of metamorphosis and its endocrine control in an insect and an amphibian.
 5. Hypophysectomy in a living frog or toad.
 6. Microscopic study of sperms and ova of frog after appropriate staining.
 7. Simple experiments on frog or toad embryos such as cultivation of parts of embryos in vitro, parabiosis transplantation, implantation, etc.
 8. Microtomy of vertebrate embryos and larvae.
 9. Alizarine and victoria blue preparation of a late chick embryo; mammalian foetus/a frog or toad tadpole.
 10. Study of oestrous cycles in a rodent.
 11. Simple experiments on chick embryos such as cultivation of early embryos in vitro by ring technique, intrablastodermic and chorio-allantoic grafting, demonstration of morphogenetic movement and metabolic gradients, study of cell-death in limbs of chick embryos, influence of teratogenic agent(s) on embryonic development, etc.
 12. Simple exercise on preparation of glass instruments; fine agar film stained with vital dyes; culture media such as embryo extract, Plasma clot, etc.
 13. Identification and separation of free amino-acids in embryonic and larval tissues and organs by paper chromatography.
 14. Simple exercises on in vitro cultivation of embryonic tissue and organs by suitable techniques.
- Scheme of Practical Exam.

4. ENDOCRINOLOGY

PAPER-V: ENDOCRINE GLANDS

Duration : 3 Hrs. Max. Marks : 100 Periods : 90

Note:- The theory paper of M.Sc. Final (Zoology) will have the following pattern.

Question paper will have 5 (five) questions in all, having equal marks

- i. Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.
- ii. Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.

(71)

(72)

10

7. The male reproductive system : Comparative anatomy and physiology of the mammalian and sub-mammalian testis and secondary sex accessory structures, testicular hormones and their functions, semen and its biochemistry.
8. The hypothalamo-hypophyseal-gonadal relationship.
9. Biology of spermatozoa and ovum : Structure, development and function.
10. Endocrinology of fertilization, implantation, delayed implantation, parturition and lactation.
11. Placenta as an endocrine tissue; foeto-placental unit.
12. Hormonal control of sex differentiation and sex determination.
13. Assisted reproductive technology (ART).

4. ENDOCRINOLOGY

PAPER-VI: REGULATORY ASPECTS

Duration : 3 Hrs. Max. Marks : 100. Periods : 90

Note:- The theory paper of M.Sc. Final (Zoology) will have the following pattern.

Question paper will have 5 (five) questions in all, having equal marks.

i. Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.

ii. Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.

iii. Question numbers 4 and 5 will be long answer type questions with internal choice.

1. Vertebrate neuroendocrinology : Ultrastructure and function of the neuro-secretory cell, hypothalamo-hypophyseal relationship, hypothalamus in relation to higher nervous centres, other neurosecretory systems in vertebrates, the urophysis, the subcommisural organ and the pineal complex.

2. Invertebrate neuroendocrinology: Anatomy and physiology of the endocrine and neuro-endocrine systems of Annelida, Arthropoda and Mollusca.

3. Endocrine integration: Diffuse effects of hormones: neoplastic growth; migration in birds and fishes; bird plumage; hibernation; osmoregulation; blood pressure regulation.

10. Bioassays for estrogens, androgens and antiestrogens; thymus assays for estrogens, androgens and antiestrogens; the Zondek pregnancy test.

11. Biochemical estimations of cholesterol and ascorbic acid content in adrenal tissue; glycogen content in uterine tissue; fructose content in honey glands.

10

Practicals:

Dissection and gross examination of various endocrine glands of representative vertebrates.

Microscopical study of various endocrine glands of representative vertebrates through microtechnical procedure.

Study of the estrous cycle in mouse or rat by the vaginal smear technique.

Surgical procedures: castration, ovarioectomy, adrenalectomy, hypophysectomy and hypophysecomy.

Bioassays for estrogens, androgens and antiestrogens; thymus assays for estrogens, androgens and antiestrogens; the Zondek pregnancy test.

Biochemical estimations of cholesterol and ascorbic acid content in adrenal tissue; glycogen content in uterine tissue; fructose content in honey glands.

10

7. Sperm count and motility.
8. Study of the sex chromatin.
9. Effects of epinephrine on chromatophores in fish.
10. Study of microscopic slides of endocrine and related structures

SCHEME OF PRACTICAL EXAMINATION AND DISTRIBUTION OF MARKS:

Duration : 5 Hrs.

	Max. Marks : 100	Total
1. Dissection or surgical procedure.	12	12
2. Exercise on bioassay or hormone administration effects.	10	10
3. Quantitative estimation of glycogen/cholesterol/ascorbic acid fructose in a given endocrine tissue.	12	12
4. Exercise on sperm count/vaginal cycle/effect of epinephrine on fish chromatophores.	8	8
5. Microtomy.	14	24
6. Identification and comments on the spots (1 to 8)	10	10
7. Viva-voce.	10	10
8. Class record.	100	100
Total		

ENDOCRINOLOGY BOOKS RECOMMENDED:

16. Egan, Ic, Publishers Ltd, 2001.

5. ENTOMOLOGY

PAPER-V : MORPHOLOGY AND PHYSIOLOGY

Periods : 90
3 Hrs. Max Marks : 100

1. The theory paper of M.Sc. Final (Zoology) will have the following pattern.
2. The paper will have 5 (five) questions in all, Having equal

length number 1 will be compulsory and will have 20 very short answer question of 1 mark each.

Numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be 2 choices in these questions.

Numbers 4 and 5 will be long answer type questions having internal choice.

2. Document: Structure, composition and functions, biochemistry, morphology of head, thorax and abdomen including segmentation and appendages.

3. Excretory system: Alimentary canal and physiology of digestive system.

4. Respiratory system: Morphology and physiology including

respiration, haemolymph.

5. Circulatory system: Structure of respiratory organs and physi-

ology of haemolymph.

6. Excretory system: Structure of respiratory organs and physi-

ology.

ology. Adaptations for aquatic respiration.

7. Excretory system: Structure of excretory organs and physiology of excretion.

8. Nervous system: Morphology and physiology.

9. Neuroendocrine system: Morphology and physiology.

10. Sense organs: Mechanoreceptors, Chemoreceptors auditor organs, sound and light producing organs, visual organs and physiology of vision.

11. Reproductive systems: Structure and physiology.

12. Embryology: Structure of egg, embryonic and post-embryonic development, types of larvae, pupae and metamorphosis, role of endocrine in growth and development, diapause viviparity and parthenogenesis.

5. ENTOMOLOGY

PAPER-VI: SYSTEMATICS, ECOLOGY AND APPLIED ENTOMOLOGY

Duration : 3 Hrs. Max. Marks : 100 Periods : 90

Note:- The theory paper of M.Sc. Final (Zoology) will have the following pattern.

Question paper will have 5 (five) questions in all, having equal marks.

i. Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.

ii. Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.

iii. Question numbers 4 and 5 will be long answer type questions with internal choice.

1. Classification of insects up to orders and suborders, basis and short history of classification. Introduction to primitive insects.

2. Detailed classification of important and selected super families and families of the following orders. Orthoptera, Isoptera, Hemiptera, Coleoptera, Lepidoptera, Diptera and Hymenoptera.

3. Social life in Isoptera and Hymenoptera.

4. Life cycle of Locusts and Aphids.

5. Origin and Evolution of insects with special reference to fossil insects; causes of success of insects.

Ecology of insects.

Effect of physical factors.
Ratio and interspecific relations.

Population dynamics.
Host-plant insect interactions.

Biochemical adaptations to environmental stress (Metamorphosis; Diapause, polymorphism etc.)
Why insects have become pests?

History, damage caused and control of major pests of :
Cotton crops e.g. sugarcane, tobacco, and mustard.
Cereal crops e.g. wheat, paddy, millet, maize, sorghum, millets.

Tests of vegetables, fruits and oil seed crops!

Cash fibre crops e.g. cotton, sunnhemp, etc.

Tests of medical and veterinary importance with reference to role of WHO and UNICEF. Insect borne diseases. (A Preliminary idea)

Storage pests (Stored grains and milled products) with an elementary idea of different types of storage.

Control : Basic idea.

Methods of insect control.
Biophylactic and cultural methods, Quarantine regulation.

Biological control.

Insect pest management, its strategies and tools in IPM. Its relevance in insect pest control.

History and mode of action of insecticides.

Inorganic insecticides.

Dicanochlorine insecticides.

Organophosphorus compounds and carbonates.
Insecticides of plant origin.
Synthetic pyrethroids.

Insect growth regulatory compounds.

Microbial insecticides.

Emulsifiers, repellents, antifeedants.

Storage and fumigation.

IV and III generation of insecticides.

(77)

(P1)

1. Biomes
 - 1.1 A-Terrestrial Biomes
 - 1.1.1 Desert
 - 1.1.2 Grassland: Prairies & Plains
 - 1.1.3 Tundra
 - 1.1.4 Temperate Needle leaf forests
 - 1.1.5 Deciduous and evergreen forests (Broad leaved)
 - 1.1.6 Topical moist Forest
 - 1.1.7 Tropical seasonal forest
 - 1.1.8 Biomes of India
 - 1.2 Aquatic Ecosystem
 - 1.2.1 Fresh water and Brackish water ecosystem
 - 1.2.2 Estuaries and wetland: Transitional communities
 - 1.2.3 Shoreline and Barrier island
 - 1.2.4 Oceanic island and reef
2. Biological Communities
 - 2.1 Critical factors & Tolerance limits
 - 2.2 Natural selection, Adaptation and evolution
 - 2.3 Ecological niche
3. Species interactions
 - 3.1 Predation
 - 3.2 Competition
 - 3.3 Symbiosis
4. Community Dynamics
 - 4.1 Productivity
 - 4.2 Abundance and diversity
 - 4.3 Complexity & connectedness
 - 4.4 Resilience & diversity
 - 4.5 Community structure
 - 4.6 Edges and boundaries
5. Communities in transition
 - 5.1 Ecological succession
 - 5.2 Introduced species and community change
6. Restoration Ecology
 - 6.1 Natural
 - 6.2 Restoring keystone species and ecological process
 - 6.3 Mitigation and replacement
 - 6.4 Creating a artificial ecosystem

1. Biodiversity
 - 1.1 Definition of biodiversity
 - 1.2 Concept of biodiversity
 - 1.3 Causes of loss of biodiversity
 - 1.4 Productivity and diversity
 - 1.5 Conservation methods- In-situ & Ex-situ.
 - 1.6 Biodiversity conversion methods: Gene bank, intellectual property right and bio-safety protocol
 - 1.7 Population dynamics
 - 1.8 Dynamics of population growth
 - 1.9 Exponential growth & doubling times
 - 1.10 Biotic potential
 - 1.11 Catastrophic declines and population oscillation
 - 1.12 Growth to a stable population
 - 1.13 Strategies of population growth
 - 1.14 Factors that increase or decrease population
 - 1.15 Mortality, Fecundity & fertility
 - 1.16 Immigration
 - 1.17 Age structure
 - 1.18 Emigration
 - 1.19 Density independent factors
 - 1.20 Density dependent factors
 - 1.21 Population estimations of animal
 - 1.22 Issues:
 - 1.23 Manipulation of indices
 - 1.24 Estimates
 - 1.25 Survey
 - 1.26 Insect
 - 1.27 Transect estimate
 - 1.28 Capture estimates
 - 1.29 Return of wildlife populations by reintroduction
 - 1.30 Breeding
 - 1.31 Hatch and release
2. Management of endangered species-reasons to preserve them
3. Factors leading to extirmination/extinction of species
4. Characteristics of endangered species.

- A. Air
1. Natural sources of air pollution
 2. Human caused air pollution
 3. acid rain
 4. Climate: Topography and atmospheric processes
 5. Global warning: The green house effect, green house gases, potential effect of global warming
 6. Control of air pollution
 7. Ozone depletion
- B. Water
1. Types and effects of water pollution
 2. Infectious agents
 3. O₂ demanding waters
 4. Plant nutrients and cultural pollution
 5. Toxic inorganic and organic pollutants
 6. Human waste disposal
 7. Waste water treatment
 8. Biogeochemical cycling
 - Carbon cycle
 - Nitrogen cycle
 - Sulfur cycle
 - Phosphorus cycle
 - Iron & other element
 9. Biodeterioration Control and Soil, Waste, and Water management
 - Control of Biodegradation
 - Management of Agricultural soils
 - Treatment of Solid waste
 - Treatment of Liquid waste
6. Microbial Interaction with Xenobiotic and Inorganic Pollutants
 - Persistence and Biomagnifications of xenobiotic molecules
 - Polychlorinated Biphenyls and Dioxins
 - Synthetic Polymers
 - Microbial Interaction Interactions with some Inorganic
 - Acid mine drainage
 - Microbial Conversions of Nitrate
 - Microbial Methylation
 - Microbial Accumulation of Heavy Metals and radio nuclides

7. Biodegradability, Testing and Monitoring the Bioremediation of Xenobiotic Pollutants
 - Biodegradability and ecological side effect testing
 - Bioprosessing, Detection of Pollutants
 - Bioremediation
 - Environmental Modification for Bioremediation
 - Microbial seeding and Bioengineering approaches to the remediation of Pollutants
 - Bio remediation of Marine Oil pollutant
 - Bioremediation of air pollutants
 - Microorganisms in Mineral and Energy Recovery and Fuel and Biomass Production
 - Recovery of metals
 - Recovery of Petroleum
 - Production of Fuels
 - Production of Microbial biomass
 - Single-cell protein production
 - Microbial Control of Pests
 - Controlling pest populations of plants and animals
 - Microbial controls of other animal pests
 - Microbial control of weeds and cyanobacterial blooms
 - Genetic engineering in biological control
 - Frost protection
 - Bacillus thuringiensis* pesticides
 - Other applications
- PRACTICAL EXERCISES**
- Paper-I
- D
1. Visit to at least 3 biomes of India for the detail study: Student should submit the report on the study covering major fauna, flora and geography.
2. Determination of population density
3. Collection of flora (herbarium) & fauna (insect).
4. Visit to ~~spp~~ of the few following natural habitats and wildlife sanctuaries: desert, mountain range, wetland, coastal habitat, forests wildlife sanctuaries of India and especially Rajasthan. (students are required to submit the joint report on the field visit s undertaken by the department)
- (B8)

5. Identification of mammalian species using hair imprinting, electrophoresis to identify the species of wildlife, collection of molt of birds.
6. Determination of population density of small mammals using transect method.
7. Collection and identification of insect fauna of wildlife habitats.
8. Collection of fecal matter samples of herbivores from wildlife habitat to study the parasitic load.
9. Determination of home range of birds/mammals.
10. Study of herd structure of herbivore populations.
11. Study of hierarchy in monkey population.

Paper-II

1. Water analysis for fresh and waste water for physicochemical properties and planktons.
2. Air quality monitoring.
3. Bioassay of polluted water using microorganism, higher animal (fish).
4. Pesticide residue analysis using GC and HPLC techniques.
5. Water pollution detection (microbial).
6. Trips to natural habitat and man made habitats to study the human impact on environment.
7. Project work.
8. Electrophoretic analysis of proteins.
9. Enumeration and isolation of soil microorganisms and plate technique, bacteria, fungi and protozoa.
10. Bacterial examination of water for portability, microorganism, E-coli, staphylococci faecalis as indicators of pollution, MPN index, IMVIC test- Endo agar.
11. Testing of water/soil/sewage for physicochemical parameters including COD and BOD.
12. Field trip to ponds/coastal/other treatment (water or industrial water) plants.

PRACTICAL EXAMINATION SCHEME	
Max. Marks-100	Marks
Exercise	5
Bioassay Exercise	10
LLC Paper chromatography : Pesticide/toxicant	10
Locomotion Exercise	10
Classification of fishes with special reference to evolutionary trends and adaptations.	10
Integument and exoskeleton.	10
Fins : Types of fins, spring modifications and functions of fins.	10
Locomotion Exercise	10
muscle fiber types, modes of swimming and biomechanics of	10

residue analysis	10
Electrophoresis : Analysis of proteins	10
Bacterial examination of water (MPN index/ IMVIC test), Microbiological exercise, agar plate technique	15
Project Report	15
Water/Waste water analysis for physicochemical properties	10
Determination of population density	5
Spotting	5
Record	10
Viva-Voce	10

Total=100

7. FISH BIOLOGY

PAPER-V: FISH BIOLOGY

Duration : 3 Hrs. Max. Marks: 100

Note: The theory paper of M.Sc. Final (Zoology) will have the following pattern.

- Question paper will have 5 (five) questions in all, having equal marks.
- i. Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.
 - ii. Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.
 - iii. Question numbers 4 and 5 will be long answer type questions with internal choice.

- Total No. of Lectures: 90
1. Classification of fishes with special reference to evolutionary trends and adaptations.
 2. Integument and exoskeleton.
 3. Fins : Types of fins, spring modifications and functions of fins.
 4. Locomotion Exercise
 5. LLC Paper chromatography : Pesticide/toxicant
 6. Classification of fishes with special reference to evolutionary trends and adaptations.
 7. Integument and exoskeleton.
 8. Fins : Types of fins, spring modifications and functions of fins.
 9. Locomotion Exercise
 10. LLC Paper chromatography : Pesticide/toxicant
 11. Muscle fiber types, modes of swimming and biomechanics of

propulsion; role of fins in swimming; significance of swimbladder in swimming; non-swimming locomotion.

5. Food, feeding habits and feeding adaptations/behaviour; structure of the alimentary canal and physiology of digestion and absorption.

6. Planktons: Classification, common organisms and their importance; algal bloom, nutrient cycle, trophic levels and energy flow.

7. Blood vascular system : Structure of the heart; principal blood vessels and circulation of blood (elasmobranch, teleost and Dipnoi)

8. Gills and aquatic respiration; Organization of gills in fishes; structure of a typical teleostean gill; physiology of gill respiration; gill ventilation, gill surface area, blood flow through gills, water-blood barrier, gas exchange at the gill surface and gas exchange between blood and tissues.

9. Air breathing fishes; causative factors and structural adaptations.

10. Structure and functions of the kidneys; nitrogenous end products and pattern of their excretion.

11. Water and electrolyte regulation in marine, freshwater and euryhaline fishes.

12. Structure and functions of the swimbladder.

13. Study of feeding habits of fish through qualitative and quantitative analysis of gut contents of herbivorous, omnivorous and carnivorous species.

14. Nervous system: Structure and functions of the central, peripheral and autonomic nervous systems; anatomy and function of the Mauthner neurons.

15. Structure and functions of the sense organs :

i. Eye: visual pigments and vision.
ii. Chemosensors: Olfactory and gustatory; biological significance of chemoreception.

15.3 Labyrinth.
i. Mechanoreceptors (lateral line organs.)
ii. Endocrine organs and tissues

16.1 Pituitary
16.2 Thyroid.

16.3 Gonads.

16.4 Adrenal.

16.5 Endocrine pancreas.

16.6 Ultimobranchial.

16.7 Caudal neurosecretory cells and urophysis.

16.8 Pineal.

17. Reproduction: Organs of reproduction; modes of reproduction; oviparity, viviparity hormonal and environmental regulation of reproduction.

18. Reproductive behaviour: Secondary sexual characters, nest building and parental care.

19. Development: Types of eggs; fertilization; hatching and metamorphosis.

20. Adaptations: Coloration, sound production, electric organs, luminescent organs (location, structure, physiology and biological significance).

21. Adaptations in deep sea, hill-stream and cave-dwelling fishes; freezing avoidance in arctic and antarctic fishes.

22. Migration; its types and causes.

23. Fish pathology: Symptoms, etiology, prophylaxis and treatment of common diseases and pathological conditions in cultivable fish.

24. Setting-up and maintenance of an aquarium.

25. Fish products and byproducts: Liver oil, body oil, meal, fish manure, guano, glue, isinglass, roe (caviar), fins and leather.

7. FISH BIOLOGY

PAPER-VI: AQUACULTURE AND FISHERIES

Duration : 3 Hrs. Max. Marks : 100 Periods : 90

Note:- The theory paper of M.Sc. Final (Zoology) will have the following pattern.

Question paper will have 5 (five) questions in all, having equal marks.

i. Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.

ii. Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.

12 (9)

12 (9)

iii. Question numbers 4 and 5 will be long answer-type questions with internal choice.

Total No. of Lectures: 90 hrs.

1. Definitions of (a) inland, (b) marine (c) capture (d) culture fisheries. 3
2. Riverine fisheries: Ecology and fisheries of the major river systems; effects of dams and barrages on riverine fisheries. 6
3. Reservoir fisheries: Location, ecology and fisheries of some important reservoirs; development, exploitation and management of reservoir freshwater fisheries. 6
4. Coldwater fisheries: Ecology of high altitude streams, lakes and reservoirs; present status and scope for development of important coldwater fisheries. 6
5. Estuarine fisheries: Ecology and fishery resources of major estuaries; potential and management of estuarine fisheries. 6
6. Marine fisheries :
 - 6.1 Ecology and general survey of marine capture fisheries with special reference to sardine, mackerel, Bonito, bay, duck and pomfret. 6
 - 6.2 Offshore and deep sea fishery potential under Q1 exclusive Economic Zone) 1
7. Estimation of fecundity and population. Population dynamics and fishery catches. 3
8. Growth and age; environmental factors and methods. 3
9. Crustaceans and Molluscan fisheries (Marinewater, Brackishwater and Freshwater). 3
10. Methods of Fishing: Crafts (non-mechanised and mechanised) and gears used in India for fishing in inland and marine water; recent advances in fishing methods, electrical fishing; light fishing, fish finders (Eco-sounder and sonar) and their use. 3
11. Transport and preservation of fish: Methods of transport, post-mortem changes and rigor mortis in fish; spoilage (bacterial and chemical); fish preservation-handling and cleaning of fresh fish, ceiling, freezing, quick freezing, use of chemicals and antibiotics; irradiation, salting, drying, freeze-drying, smoking, canning and pickling. 5
12. Fishery management: fish yield, effect of fishing on yield and optimum catch, concept of a rational fishery. 3

13. Ecology and Productivity of freshwater lake and perennial fish-pond' indices of productivity; physical and chemical characteristics of water, nature and fertility of the soil. 3
14. Environment and fish: Environmental factors (abiotic and biotic), interrelation to the life of fishes; pollution of aquatic ecosystems sources of pollution and nature of pollutants, effects of pollution on fisheries, legislative and other remedial measures to contain aquatic pollution. 3
15. Freshwater fish culture in India; Fish seed resources (riverine, bunch breeding, hypophysis) hatching of eggs, hatchlings, 'hapas' and different types of hatcheries, management of hatcheries; methods of transporting fish seed, fingerlings and breeders; causes of mortality during transportation and measures for reducing it. 7
16. Planning and management of freshwater ponds for fish culture (freshwater fish-farming); survey of site, layout, soil and water requirements; preparation of nursery, rearing and stocking ponds; control of predators and weed fishes; liming and manuring, control of aquatic insects and weeds; procurement and segregation of fish seed; stocking rates; stocking ratios of different species for composite culture; artificial feed and supplement feeding, harvesting. 7
17. Culture of Indian major carps (rohu, catla and mrigal) exotic carps Common carp, grass carp, silver carp and tilapia; composite culture principle, techniques and significance; Wet and dry bunch technique, induced breeding, hypophysisation, selective breeding and hybridization. 6
18. Cold-water culture of trout: mahseer, culture method and management. 6
19. Larivorous fishes and their importance. 2
20. Nutrition and physiological energetic: Nutritional requirement of fish with reference to proteins, lipids, carbohydrates, vitamins and minerals; essential amino acids and essential fatty acids; energy requirements; food conservation, efficient energy budgets. 2
21. Fish as food: Biochemical composition of raw fish, factors affecting biochemical composition of fish, nutritive value of raw and preserved fish, poisoning, toxicity and allergies from fish as 2

- 2 food; quality control of fish as food.
22. Fisheries education, training and extension in India : Brief information about the objectives and functions of central Institute of Fisheries Education (Bombay) Central Inland Capture Fisheries Research Institute (Barrackpore) Central Institute of Freshwater aquaculture (Chennai), National Bureau of Fisheries Genetics Resources (Allahabad), Central Marine Fisheries Research Institute (Cochin), Central Institute of Fisheries Nautical and Engineering Training (Cochin), Central Institute of Fisheries Technology (Cochin) and National Institute of Oceanography (Dona Paula)

List of Practicals Exercises

1. Study of distinguishing features, identification and classification of specimens of important species of fish available in the museum; Collection of local fish fauna and its identification upto the species level using taxonomic keys.
2. Anatomy and Histology:
 - (a) Study of anatomy of teleost represented by the catfish wallago attu:

External anatomy and gills, Viscéra, alimentary canal and urinogenital organs; musculature for gill ventilation, and feeding; eye muscles and their innervation; endoskeleton (through dried and alizarin preparation), branchial blood vessels, brain and cranial nerves, swim bladder, weberian ossicles, membranous labyrinth connections.
 - (b) Preparation and study of stained permanent mounts of ampullae of Lorenzini (from Dasyatis), otolith, scales (Placoid, cycloid and ctenoid), gill filament and olfactory lamella.
 - (c) Dissection of air-breathing organs and their blood supply in Anabas testudineus, Clarias batrachus, H. tropneustes fossilis and channa sp.
 - (d) Study of fish anatomy and histology through available slides.
3. Preparation of microscopic slides of stained sections of following organs/tissues/ structures from an adult teleost for their histological study of liver, intestine, kidney, testis, Ovary, gill, pituitary, thyroid tissue, head kidney (for interrenal and chromaffin cells).

4. Physiology and biochemistry.

- 4.1 Study of the effect of epinephrine, NaCl, and KCl on fish chromatophores.
- 4.2 Study of changes in chromatophores of fish kept against white (light) and black (dark) backgrounds for protracted periods.
- 4.3 Determination of the rate of oxygen consumption (Winkler method) in a water breathing fish at different temperatures.
- 4.4 Determination of the rate of ammonia and urea excretion in fish.
- 4.5 Estimation of protein, fat, ash and water contents in fish muscle.
- 4.6 Study of free amino-acid pool in fish muscle through paper chromatography.

5. Basic Laboratory Techniques:

5. Maintenance of fish in freshwater: Setting up to an aquarium, quality of water in the aquarium and its aeration; Introduction of fish in the aquarium; feeding of fish and management of aquarium.
- Ecology: Physico-chemical analysis of water.
Age and growth.
Identification of maturity stages of fish; determination of gonadosomatic index; estimation of fecundity; measurement of ova diameter.
- Plankton, Benthos and Primary productivity: Collection of plankton and its qualitative and quantitative analysis; identification of common groups of freshwater plankton; collection and analysis of benthos from a freshwater fish pond; identification of common weeds, predatory fishes and harmful insects in a freshwater fish pond; estimation of primary productivity in a freshwater pond or lake by dark and light bottle method.
Identification of important cultivable species of fish, their eggs and principal stages in their life histories.
- Induced breeding through hypophysation, dissection, collection and preservation of pituitary gland; preparation of pituitary gland extract; dosage and technique of injecting pituitary gland extract.

Water Analysis, determination of water temperature, light, tur-

bility, dissolved oxygen, dissolved carbon dioxide, ammonia, salinity, alkalinity, nitrates, phosphates, pH, particle size, available nitrogen and free calcium carbonate.

Fish anaesthetics and anaesthesia; simple surgical procedure (gonadectomy), fish saline.

Fieldwork and study tour

- 1.1 A visit to a fish farm/fish seed production centre.
- 1.2 3 to 4 day tour to study various fisheries activities at selected centres/sites.

Scheme of Practical Examination

	Max. Marks 100	10+5=15
1. Major dissection	10	
2. Minor dissection/ slide preparation/ species identification	5	
3. Identification and comments on spots (1-8)	24	
4. Microtomy procedure and preparation of slides	10	
5. Plankton identification/primary productivity/ water analysis	8	
6. Physiology/biochemistry	10	
7. Determination of age / growth / maturity stage/ GSI	5	
8. Record / Field work	10	
9. Viva-voce.	10	
Total	100	

Books recommended

(FISH BIOLOGY)

1. Hoar, W.S., Randall, D.I. (eds) : Fish Physiology, Vol I to II Academic Press.
2. Norman, I.R. : A History of Fishes.
3. Brown, M.E. : The Physiology of Fishes, Vol I & II.
4. Langier, K.F. : Ichthyology, Wiley & Sons, New York.
5. Chandy, M. : Fishes, National Book Trust, India.
6. Bond, B.C. : Biology of Fishes, Saunders, Philadelphia.
7. Jhingran, V.G. : Fish and Fisheries of India, Hindustan Publication Corp., India.
8. Day, F. : The Fishes of India, William Dawson and Sons, London.

8. RADIATION BIOLOGY

PAPER-V: BASICS OF RADIATION

Duration : 3 Hrs. Max. Marks : 100 Periods : 90

Note:- The theory paper of M.Sc. Final (Zoology) will have the following pattern.

Question paper will have 5 (five) questions in all, having equal marks

- i. Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.
 - ii. Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.
 - iii. Question numbers 4 and 5 will be long answer type questions with internal choice.

- 5.6 External and internal dosimetry.

56

57

QUESTION PAPER

5.7 Microdosimetry.

5.8 Maximum Permissible Dose (MPD)

6. Detection and measurement of radiation

6.1 Ionization chamber.

6.2 Scintillation detectors.

6.3 G.M. counter.

6.4 Proportional counter.

5.5 Gamma ray spectrophotometer.

6.6 Radioautography, RIA.

7. Radiation chemistry

7.1 Radiolysis of water.

7.2 Hydrogen peroxide formation.

7.3 Reactions in aqueous organic solutions.

7.4 Direct and indirect effects.

7.5 Oxygen effect.

8. Sources of Radiation Hazards

8.1 Natural sources.

8.2 Artificial sources.

8.3 Sealed and unsealed sources.

8.4 External radiation hazards.

8.5 Internal Radiation hazards.

9.

Radiation Monitors

9.1 Personnel monitoring equipments.

9.2 Film badge.

9.3 Pocket dosimeter.

9.4 Thermo Luminescence Dosimetry (TLD)

9.5 Area monitoring.

10. Radioactive Contamination and Decontaminations

10.1 Source of contamination.

10.2 Control of contamination.

10.3 Contamination monitoring.

10.4 Decontamination

11. Radioactive waste management

11.1 Characteristics of radioactive waste.

11.2 Management of nuclear waste.

11.3 Discharge of wastes.

12. Decontamination

12.1 General methods.

12.2 Chemical decontamination.

12.3 Physical decontamination.

12.4 Biological decontamination.

12.5 Nuclear decontamination.

12.6 Radioactive waste disposal.

12.7 Radioactive waste treatment.

12.8 Radioactive waste recycling.

12.9 Radioactive waste storage.

12.10 Radioactive waste transportation.

12.11 Radioactive waste treatment and disposal.

12.12 Radioactive waste recycling.

13. Environmental impact of radioactive waste.

13.1 Radioactive waste management.

13.2 Radioactive waste treatment.

13.3 Radioactive waste recycling.

13.4 Radioactive waste disposal.

13.5 Radioactive waste storage.

PAPER-VI: RADIATION EFFECTS

Duration : 3 Hrs. Max. Marks : 100 Periods : 90

Note:- The theory paper of M.Sc. Final (Zoology) will have the following pattern.

Question paper will have 5 (five) questions in all, having equal marks.

- i. Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.
- ii. Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.
- iii. Question numbers 4 and 5 will be long answer type questions with internal choice.
 1. Interaction of radiation with matter.
 - 1.1 Direct effects of ionizing radiation.
 - 1.2 Indirect effects of ionizing radiation (photoelectric effect, Compton Effect, pair production).
 - 1.3 Bremsstrahlung effects.
 - 1.4 Interaction of neutrons.
 - 1.5 Nuclear fission and fusion (production of isotopes, nuclear reactors and accelerators).
 2. Cellular radiobiology
 - 2.1 Apoptosis.
 - 2.2 Reproductive cell death.
 - 2.3 Survival curves.
 - 2.4 Radiosensitivity of cell cycle phases.
 - 2.5 Factors influencing radio sensitivity (oxygen effect & chemical modifiers).
 3. Acute radiation effects
 - 3.1 Concept of LD50.
 - 3.2 Central nervous system syndrome.
 - 3.3 Gastro-intestinal syndrome.
 - 3.4 Bone marrow syndrome.
 - 3.5 Skin reactions.
 4. Delayed effects of radiation

4.1 Stochastic and deterministic effects.

4.2 Radiologic aging.

4.3 Life shortening.

4.4 Radiation carcinogenesis.

5. Radiation effects on embryo and foetus

6. Radiation immunology

6.1 Immunity response.

6.2 Radiation as immunosuppressive agent.

6.3 Long term changes in the immunological reactivity of the irradiated organisms.

7. Cytogenetic effects of radiations.

7.1 Chromosomal aberrations.

7.2 Micronuclei induction.

7.3 Radiation mutations.

8. Radiation Hormesis.

8.1 Evolution of current radiation paradigms.

8.2 Epidemiological evidence.

8.3 Experimental studies and adaptive response.

9. Radiation hazard evaluation and control

9.1 Control of external hazards.

9.2 Control of internal hazards.

9.3 Exposure rate constant.

10. Radiation Accidents (special reference to Rajasthan-Pokharan I&II)

11. Radiation safety and regulatory aspects

11.1 Radiographic installations.

11.2 Enclosed installations.

11.3 Field installations.

11.4 Personnel management.

11.5 Source storage facilities.

11.6 Safe work practice.

11.7 Recommendations of National/International statutory bodies.

LIST OF PRACTICAL EXERCISES

Radiation Biology

1. Knowledge and use of the various instruments. Geiger-Muller counters. Decade Scalar, Scintillation counters (Crystal and Liquid), Survey meter, Single-channel gamma spectrometer, Autograph system, Cobalt camera.
2. Finding out the operating voltage of the G.M. tube.
3. Calculation of Inverse Square Law.
4. Determination of the resolving time of the G.M. tube.
5. Absorption of β and gamma rays.
6. Determination of self-absorption factor.
7. Determination of backscattering factors.
8. Finding out the physical half-life of a given isotope:
 - (a) Single isotope method.
 - (b) From a mixture of two isotopes.
9. Autoradiography
 - (a) Liquid-emulsion method.
 - (b) Stripping film method.
10. Histopathological, histochemical and biochemical studies of various tissues after external and Internal irradiation.
11. Personnel monitoring. Use of G.M. survey meter, Film badge, and Room contamination monitor.
12. Study of permanently prepared histopathological slides.
13. Decontamination of contaminated material.
14. Visits to the Radiology Department, S.M.S. Medical College, Jaipur, Rajasthan, Atomic Power Project, Kota and Bhabha Atomic Research Centre, Mumbai.
15. Class Record.
16. Viva-voce.

SCHEME OF PRACTICAL EXAMINATION

- | | |
|--|----------|
| 1. Major exercise (3 hours) | 24 marks |
| 2. Minor exercise (1 hour) | 16 marks |
| 3. Preparation and study of a histopathological slide/ histochemical/biochemical estimation of various macromolecules in different | |

tissues (Proteins, glycogen, cholesterol, Nucleic acids etc.)

- 4. Spotting (8) 16 marks
- 5. Viva 24 marks
- 6. Record 10 marks
- 10 marks

9. REPRODUCTIVE BIOLOGY

PAPER-V: ENDOCRINE GLANDS AND REGULATORY PROCESSES

Duration : 3 Hrs. Max. Marks : 100 Periods : 90

Note:- The theory paper of M.Sc. Final (Zoology) will have the following pattern.

i. Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.

ii. Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.

iii. Question numbers 4 and 5 will be long answer type questions with internal choice

1. Endocrine glands: An overview 1
2. Biochemical nature of hormones 2
3. Mechanism of hormone actions 3
4. Structure and nomenclature of steroid hormones, steroidogenesis. 5
5. The female reproductive system: Comparative anatomy and physiology of the mammalian and sub mammalian ovary and ductal system. Follicular growth, kinetics and atresia, ovarian hormones, two cell theory of estrogen biosynthesis. Autocrine, Paracrine and endocrine regulation of ovarian functions. 12
6. The male reproductive system: Comparative anatomy and physiology of the mammalian and sub mammalian testis, epididymis and the sex accessory glands; Functional organization of testis, spermatogenic cycle. Testicular androgens, autocrine, paracrine 63

and endocrine regulation of testicular functions. Semen and its biochemical nature. 12

- 7. Regulation of reproduction 10
- 7. b. The pituitary gland: Functional cytology, adenohypophyseal hormones, their chemistry and physiology. 10

- 7.2. The Hypothalamus and its neurosecretory centres: Structure of neurosecretory cells, the hypothalamic principles: synthesis, storage, release and chemistry. 7
- 7.3. The phenomenon of neuroendocrine integration and the hypothalamo hypophyseal gonadal axis. 7

- 8. Role of thyroid, pineal and adrenal glands in reproduction. 7
- 9. Breeding seasons and reproductive cycles. 3
- 10. Hormonal regulation of reproductive behaviour. 3
- 11. Biology of Sex-determination and Sex-differentiation. 3
- 12. Biology of spermatozoa and ovum: structure, development and function. 4
- 13. Fertilization: Pre-fertilization events, biochemistry of fertilization and post-fertilization events. 4
- 14. Implantation and its hormonal regulation, delayed implantation 3
- 15. Placenta as an endocrine tissue: foeto-placental unit. 3
- 16. Gestation and its hormonal regulation 2
- 17. Parturition and its hormonal regulation. 2
- 18. The mammary gland: Endocrinology of lactation. 2
- 19. Prostaglandins: Chemistry, mechanism of action and their role in reproduction. 4
- 20. Miscellaneous factors affecting reproduction : nutrition, light, temperature, pheromones, environmental disruptors. 4

9. REPRODUCTIVE BIOLOGY

PAPER-VI: REPRODUCTIVE TECHNOLOGIES

Duration : 3 Hrs. Max. Marks : 100 Periods : 90

Note:- The theory paper of M.Sc. Final (Zoology) will have the following pattern.

Question paper will have 5 (five) questions in all, having equal marks

marks

63

UNIVERSITY OF RAJASTHAN JAIPUR

Scheme of practical examination

Duration : 5 Hrs.

	Max. Marks : 100
1. Dissection of male and female reproductive organs surgical procedures.	12
2. Monitoring of exocrine and endocrine functions of gonads.	10
3. Biochemical investigations of marker parameters.	12
4. Microtomy.	12
5. Hormonal bioassay Pregnancy test, <i>in vitro</i> fertilization (GIFT, ZIFT, TET, ICSI)	10
6. Spots (1-8)	24
7. Viva-Voce.	10
8. Class-Record.	10
Total	100

❖❖❖

RULES FOR THE AWARD OF GRACE MARKS

1. UNDER GRADUATE/POST GRADUATE (MAIN/SUPPLEMENTARY) EXAMINATION UNDER THE FACULTIES OF ARTS, FINE ARTS, SCIENCE, COMMERCE, SOCIAL SCIENCE, EDUCATION, MANAGEMENT, HOMOEOPATHY, LAW, AYURVEDA AND ENGINEERING & TECHNOLOGY.
2. Marks to the extent of 1% of the aggregate marks prescribed for an examination will be awarded to a candidate failing not more than 25% of the total number of theory papers, practicals, sessionals, dissertation, viva-voce and the aggregate, in which case may be, in which minimum pass marks have been prescribed; provided the candidate passes the examination by the award of such Grace Marks. For the purpose of determining the number of 25% of the papers, only such theory papers, practicals, dissertation, viva-voce etc. would be considered, of which, the examination is conducted by the University.

N.B. : If 1% of the aggregate marks of 25% of the papers works out in fraction, the same will be raised to the next whole number. For example, if the aggregate marks prescribed for the examination are 450, grace marks to the extent of 5 will be awarded to the candidate, similarly, if 25% of the total papers is 3.2, the same will be raised to 4 papers in which grace marks can be given.

General

A candidate who passes in a paper/practical or the aggregate by the award of grace marks will be deemed to have obtained the necessary minimum for a pass in that paper/practical or in the aggregate and shown in the marks sheet to have passed by grace. Grace marks will not be added to the marks obtained by a

अकादमिक प्रभारी

- i. Question number 1 will be compulsory and will have 20 very short answer question of 1 mark each.
 - ii. Question numbers 2 and 3 will consist of only short answer type questions with 4 subdivisions of 5 marks each. There will be internal choice in these questions.
 - iii. Question numbers 4 and 5 will be long-answer type questions with internal choice.
1. Fundamental aspects of control of fertility in females : 12
- 1.1 Mechanical.
 - 1.2 Surgical.
 - 1.3 Chemical.
 - 1.4 Immunological methods.
2. Fundamental aspects of control of fertility in females : 14
- 2.1 Natural.
 - 2.2 Mechanical.
 - 2.3 Surgical.
 - 2.4 Chemical.
 - 2.5 Immunological.
 - 2.6 Emergency contraception.
3. Control of fertility in Insects.
4. Induced spawning in fishes.
5. Techniques for improvement of breeding Farm animals.
6. Anatomy and physiology of the endocrine and neuroendocrine structures of annelids, arthropods and Mollusca with special reference to their role in reproduction.
7. Reproductive dysfunctions in males and females.
8. Diagnosis of male infertility :
- 8.1 Semen analysis: Physical examinations, microscopic examinations, biochemical analysis, Immunological tests.
 - 8.2 Sperm function tests: Sperm mitochondrial Hypo-osmotic swelling test, acrosome reaction, Zona binding assays, Acrosome intactness test, and hamster- oocyte penetration test.
 - 8.3 Endocrinological diagnosis.
 - 8.4 Diagnosis of female infertility :
 - 9.1 Monitoring of ovarian and reproductive cycles

- 9.2 Endometrial biopsy.
- 9.3 Ductal blockage.
- 9.4 Endocrine diagnosis.
10. Assisted Reproductive Technology (ART).
 - 10.1 Super ovulation, oocyte collection.
 - 10.2 Collection and preparation of sperm, for assisted fertilization.
- 10.3 Insemination.
- 10.4 *In vitro* fertilization and related techniques (IVF, GIFT, ZIFT, TET, ICSI).
11. Cryopreservation of semen, oocytes and embryos.
12. Cloning, transgenic animals.
13. Teratological effects of Xenobiotics.
14. Pre-natal diagnosis.
15. Impact of aging, hormone replacement therapy.
16. Hormonal bioassay :
 - 16.1 ELISA.
 - 16.2 Radio Immuno assay (RIA).
 - 16.3 Radioreceptor binding assay.

LIST OF PRACTICAL EXERCISES

- Practicals:*
1. Dissection of male and female reproductive systems.
 2. Histology of the genital organs in normal and pathological conditions (Microtomy).
 3. Monitoring of the exocrine and endocrine functions of gonads. (Vaginal smear, sperm function tests)
 4. Biochemical investigations of the reproductive glands with special reference to their markers.
 5. Surgical procedures in reproduction.
 6. Induction of superovulation and collection of oocytes.
 7. Demonstration of *in vitro* fertilization (Acacia), Registration (Acacia), Recovery of oocytes
 8. Hormonal bioassays.
 9. Pregnancy test.
 10. Study of permanent histological slides : Various endocrine glands, male and female reproductive systems.
